Dealers Expected To Crowd FUN Show

The FUN Show Committee has reported over 900 hotel rooms had been booked by December 15th for their upcoming convention in Florida. They expect around 15,000 attendees at one of the year's largest and best attended shows. This show will be a barometer of what dealers can expect for the next few months. The Mid-American Auction is conducted in conjunction with the FUN Show and dealer activity alone could make for higher than anticipated prices realized.

In order to keep up with competition, or even attempt to pull ahead, some businesses make strong efforts to improve their products, whether they be goods or services. The three grading services within are no different. Over the last few months they have worked to lower the cost of their service or speed up the time it takes to have coins graded. The following information can be used as a comparison of various aspects of each grading service.

Minimum cost of the regular service (postage and insurance are not included) is ANACS - $20, NCI - $20, and PCGS - $22 per certification. The turnaround time is based on business days after the coin has been received by the grading service. ANACS - 8/10 days, NCI - 5/10 days, and PCGS - 100 days. ANACS currently grades about 7000 coins per month, NCI about 12,000, and PCGS about 20,000.

Each grading service does offer some sort of special extra service. ANACS will give a 10% discount to ANA members only, if they send in 10 or more coins in one package. This discount does not apply to the postage and insurance. NCI will charge $10 per coin when two conditions are met. First, there have to be a minimum of 100 coins per package, and second, the highest owners stated value cannot exceed $250 per coin. Turnaround time may increase on these larger packages to between 10/20 days at most. PCGS has express lots, which are offered to PCGS market makers. They cost $55 each and are usually graded within 10 days. They also have a 2-day service which costs $100 each.

Whether your experience falls within these guidelines or not, these are the time standards which these three services specified to us.

Prooflike dollars have been added to the silver dollar page. Included are MS-63 P/L, MS-64 P/L, and MS-65 P/L. As you can see, the only column which contains a majority of the bids is the MS-63 P/L column. Now that space has been created for these dollars, we anticipate many more dealers will begin to make specific markets in these areas.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A nonprofit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $21. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 852-9216. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 80 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate.
Previous years certificates will bring substantially less than bids.

Lack of Dealer Support Prolongs Dollar Slide

ANACS coins are beginning to receive renewed attention, especially in the areas of silver dollars, commems, and walkers. Up until recently, PCGS was getting the majority of dealer bidding activity, but, the last few weeks have found various dealers trying to make markets in the previously mentioned series. They are primarily looking for MS-64 and 65 coins which are bid at $2000 or lower. ANACS gold has been very active all along; in this area, many dealers buy and sell most grades from MS-60 through MS-65.

The overall market appears very steady for silver and gold commems (MS-63 and higher). MS-63 or better gold commems just are not very plentiful which lessens the number of collectors for this series. There are obviously many more silver commems available to the collecting or investing fraternities, yet, supplies seem to diminish for all but a few specific more common issues. As more coins receive grades from the various services, it will become more apparent which coins are the rarest.

If all grading services would keep track of the various coins they grade in each specific grade (like PCGS—it would be nice if these population figures were made available to the collectors/investors), then, sometime in the near future, we could compile availability figures by grade, rather than by the sometimes meaningless mintage figures which may not be relative to high grade coins. This would enable those numismatists who wish to buy rarity the opportunity to learn what is truly rare.

The Morgan dollar market continues in its downward trend. There are long runs of minus signs with few dates being ignored. There seems to be a quiet panic as few dealers will step up and pay bid, especially for MS-65's. Even the high buyers of better and rare dates, the ones who are responsible for the increased bids, have backed off and are not protecting or supporting those bids. In fact, in some cases, the high buyers now have no bids for these big rarities. Yes, the coins are still rare, but so is the buyer at those high levels.

Peace dollars are not experiencing any problems as of this writing. Peace dollars, characteristically, are weakly struck, so it takes a very nice coin to make the MS-64, 65, or 66 grade. To try and buy what specimens do come on the market, buyers are continually raising their bids.

In the area of type coins, PCGS is commanding the majority of bid changes. Most MS-64 and 65 coins are stable or a little higher, while almost all PR-64's are lower. PR-65 coins have an even balance of pluses and minuses and PR-66 specimens are mostly higher.

For the most part, U.S. gold is stable except for the $20 St. Gaudens. There appears to be a large availability of PCGS-61, 62, 64, and 65 coins. Obviously, since these certified coins have a fast cash market, this is one of the issues that more dealers have sent in to be graded. While at first there was a short supply and prices ran up, now, with many coins being graded in all grades (MS-60 thru 65) prices are not unexpectedly falling.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 852-9216. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 80 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate.
Previous years certificates will bring substantially less than bids.

The Certified Dealer's Choice

The Numismatic Certification Institute is recognized as the favorite independent grading service of thousands of collectors and dealers across the nation. Because while we're giving you buying confidence, we're giving you a lot more.

We offer "real world" grading by widely respected experts such as Jim Halperin and Steve Ivy — grading based on the market that you're trading in everyday. And our authenticity opinions are insured for up to one million dollars.

How do we grade coins? It's no mystery. We follow the same standards as used by Jim Halperin in his book the *N.C.I. Grading Guide*, available to the general public.

What's more, our certificates feature detailed and accurate full-color photos of the obverse and reverse of each coin. And you'll get our certification within a 10-day turnaround. Guaranteed.

Of course, the fact that many dealers tell us that coins with NCI certificates sell faster may have something to do with our popularity, too.

Fill out the form below and try out NCI's wide variety of special dealer services. And discover why when it comes to top coin collectors and dealers across the nation, we're the certified choice.

NCI. The Certified Choice.

FUN Show Active, At Generally Lower Levels

The market at the just concluded FUN Show can be summarized very briefly: Extremely active at lower levels. There are a few areas of exception as commems, walkers, and mercs were very strong at this convention. These series have many active players at current bids and even though some dealers may have plenty of inventory, coins seem to sell rapidly if priced competitively.

The whole commem series is stable at current bids in all grades. There are enough collectors and investors to keep this series quite active. Mercury dimes are especially strong in MS-64, 65, and 66—almost all dates from 1916 to 1945. What doesn't appear too popular, for the time being, are split band specimens. This is a very thin market as bid buyers are few and far between.

Walking Liberty half dollars are also an active area for the issues from 1941 thru 1947. All grades of mint state appear stable at current levels, except MS-64's, which are stable at the new lower bids. As the grades get higher than MS-64, the strength of this series becomes more significant.

At the FUN Show, the majority of dealers kept their certified bids quite inconspicuous. They did not have their usual printed bids to work from, mostly because they wanted to see what the other dealers were going to do. In addition, active bids are even becoming scarce on the two major teletype systems. In many cases, dealers have withdrawn their bids. As a result of the FUN Show and a general lowering of dealer bids, there are a tremendous number of minus signs as bids adjust downwards.

The weakest series now appears to be PCGS Morgan dollars, in MS-64 and 65. Dealers have lowered bids anywhere from 10% to 30%. And in a few cases, bids for some of the rare date dollars cannot even be found. This creates a very thin market in these areas. Peace dollars do continue to be in strong demand at current levels and it was apparent at FUN that this series is becoming very popular. Moreover, in MS-64 and better, these issues are difficult to locate.

U.S. gold was very active at FUN, but prices were generally lower for the coins that were available. Saints still appear to be very plentiful in grades MS-60 thru 65. One factor that may have helped increase business in the gold series (possibly some others) may have been that dealers were able to view coins, thus, picking at higher levels that their normal "sight unseen" bids. This increased buying flexibility and enables dealers to supply their customers with a little nicer coin.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 852-9216. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 80 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate. Previous years certificates will bring substantially less than bids.

Do you know what the highest buyers are paying for ANACS, NCI, or PCGS certified 1882-S Morgan Dollars? Or? ...

You would if you subscribed to *Certified Coin Dealer Newsletter* — The only certified newsletter that publishes updated prices for the most active areas of the market on a weekly basis.

The *Certified Coin Dealer* newsletter, published by the Coin Dealer Newsletter, is the newest price guide on wholesale levels of ANACS, NCI, and PCGS coins in various grades of Mint State and Proof.

The *CCDn* reports the highest known bids of actively traded coins, which have been certified by ANACS, NCI, and PCGS. At this time, the coins from these three grading services are the most widely traded.

The prices shown in the *CCDn* are based upon data from all major market makers in the certified coin segment. The publishers of the *CCDn* do not buy, sell or trade coins. In short, there are no persuasive forces that might distort the true market picture.

Since the early 1960's, the "Coin Dealer Newsletter" has been America's #1 wholesale numismatic price guide. The same publishers present America's premiere wholesale price guide for certified coins — a compilation of pricing data on all actively traded certified coins.

Subscribe today and get the most comprehensive price guide on the certified coin market.

Vol. II No. 4 January 23, 1987 Single copy price $3.50

American Eagles Soften Rare Coin Market

PCGS may have been the biggest news to hit the rare coin industry in 1986, but the U.S. Government is having an even larger influence on the rare coin market as we move quickly into 1987. The American Eagle Program has taken millions of dollars out of the rare coin industry. Not only have dealers purchased millions of "Eagles," so have collectors and investors. Granted, the eagles are supposed to be bullion coins, and bullion buyers may not be numismatists, but, even if 10% of the money spent on eagles had been spent on rare coins, it would have meant millions of dollars going into rare coins, rather than the opposite being the case – millions going out of the rare coin market.

What does this have to do with the "price of tea in China?" Nothing. But, it does directly effect bid levels for the coins that dealers have in inventory. The more plentiful coins have seen bids fall dramatically as dealers lower their bids, not wishing to add to an already dead inventory. The most obvious case in point, is with MS-65 dollars. Many issues have dropped as much as 50% and this is causing a panic that runs into most of the lower grades. In a few instances, dealers are willing to pay the new lower bids, but, for the most part, they continue to lower their buy prices under the revised lower bids. In other words, nobody wants to be the higher buyer, for the time being.

A long run of adjustments can be found in the MS-61 and MS-62 columns of Morgan dollars, along with a weaker MS-61 Peace dollar market. However, there are numerous plus signs in the MS-64 column of Morgans and the higher grade Peace dollars continue at a very strong pace.

In the commemorative series, MS-61 and 62, silver and gold commems are weaker for PCGS graded coins. However, MS-63 and higher grade issues remain active at current levels except for some of the Oregon and Texas issues which are seeing some markedly lower bids.

Mercury dimes have found new higher buyers for MS-64 specimens from 1916 thru 1938. The rest of this market remains stable at today's levels for the higher grades also. Full band coins still appear a little soft as specific individual coins go unsold at discounted prices.

Buffalo nickels, in MS-65 (1913-1926), are stronger, yet, lower grades are not faring as well. There is a rash of minus signs throughout the MS-63's and 64's as dealers lower their bid levels. It appears obvious that more coins are coming on the market creating this less than desirable reaction.

For the most part, U.S. gold is strong for MS-65 and higher grades (Exception: MS-65 Saints). It is apparent to those active bidders that not much is available. The MS-64 and lower material has some softness, yet, this market remains quite active at the new lower bids.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A nonprofit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 852-9216. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 80 authorized PCGS dealers who will send in coins for grading. These dealers and many more who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown) full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate. Previous years certificates will bring substantially less than bids.

CERTIFIED COIN DEALER newsletter

Vol. II No. 5 January 30, 1987 Single copy price $3.50

Peace Dollars Flourish Through Strong Competition

While studying the bid changes in the following pages, one will note that the majority of changes take place in the PCGS columns. There is a good reason for this: The major activity in certified coins is for PCGS graded coins. There are more dealers trading PCGS coins, on a daily basis, than any other grading service coins. Many dealers make daily buy/sell spreads on a variety of issues, although this system has a considerable built-in drawback which is not a characteristic of the other grading services: That is, volatility. Bid prices are strictly a function of supply and demand. If a bidder has more than he needs in inventory he will lower or withdraw his bid, thus, if there is not another bidder within close range, and this has been the case recently for Morgan dollars, then bids could drop drastically from one week to the next. For now, this is a "catch 22." Granted, this is a ready cash market, but, it lacks consistent everyday bidding in all markets. As more people become involved in this market, this lack of consistency should correct itself.

The Morgan dollar market is undergoing an uncharacteristic freefall. Dealers are almost stumbling over each other trying to *not* be the high bidder. After all the years of consistent increases, it has come as somewhat of a shock to many dollar dealers that prices could fall so long and so hard. Yet, this has been the case for many weeks now.

On a positive note, it seems that many dealers are increasing their bids for rare dates. For awhile, it seemed they wanted nothing to do with them, but now, they once again realize that their low bids only contributed to an already weak overall market, so their new higher bids are much more realistic and in line with the rarity factor.

Peace dollars continue very active in MS-63 and higher. The interesting point here is that there are numerous buyers at current levels. In the cases where bids are higher, dealers are actually raising their bids $5 to $25 depending on the relative value of the issue. This evokes a feeling of confidence that they actually want to buy coins at these levels, rather than in the past where bidders would raise their bids 20% just to see the bid levels go up.

Commems remain an active series in all grades, although many bids are adjusting somewhat. MS-63's and 66's are stable to higher, while MS-64's and 65's find some corrections downwards. Do not be misled by the number of minuses as they only represent lower overall bids on the part of the high buyers. When coins are offered as single lots, they usually sell quickly, at, or above, current levels. The lower bids are a result of some dealers not wanting to buy a bunch of one or two specific issues.

Walking Liberty half dollars, in MS-64 & 65 (1941-47) are generally weaker as sellers become more plentiful. There seems to be a large dealer supply of the more common issues, especially MS-64's.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986 by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 852-9216. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 80 authorized PCGS dealers who will send in coins for grading. These dealers and many more who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red brown), full bands on Mercury dimes, full head on Standing Liberty quarters and prooflike on dollars.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate. Previous years certificates will bring substantially less than bids.

Do you know what the highest buyers are paying for ANACS, NCI, or PCGS certified 1882-S Morgan Dollars? Or? ...

You would if you subscribed to *Certified Coin Dealer Newsletter* — The only certified newsletter that publishes updated prices for the most active areas of the market on a weekly basis.

The *Certified Coin Dealer* newsletter, published by the Coin Dealer Newsletter, is the newest price guide on wholesale levels of ANACS, NCI, and PCGS coins in various grades of Mint State and Proof.

The *CCDn* reports the highest known bids of actively traded coins, which have been certified by ANACS, NCI, and PCGS. At this time, the coins from these three grading services are the most widely traded.

The prices shown in the *CCDn* are based upon data from all major market makers in the certified coin segment. The publishers of the *CCDn* do not buy, sell or trade coins. In short, there are no persuasive forces that might distort the true market picture.

Since the early 1960's, the "Coin Dealer Newsletter" has been America's #1 wholesale numismatic price guide. The same publishers present America's premiere wholesale price guide for certified coins — a compilation of pricing data on all actively traded certified coins.

Subscribe today and get the most comprehensive price guide on the certified coin market.

Overabundance of MS-64 Walkers on Market at Present

The certified coin market is undergoing a vast amount of changes at this time, especially the way dealers are bidding for coins. With the current downswing in most major markets, dealers are updating and changing their bids, mostly to the downside, faster than sellers can sell coins to the buyers. Since dealers are trying to protect themselves with their conservative bidding, it has the effect of a dramatically volatile market. As an illustration, we need to look no further than Walking Liberty halves in MS-64. Most issues in the 1934-47 short set have fallen as much as 20% in the last week. And most bidders don't really want to buy them at any level. This crash is an example of what can happen when a series becomes oversold.

Much of the higher bidding activity is taking place for MS-66 and better quality coins. This is occurring in almost every series as dealers try to outbid each other for the available coins. The real problem here is that it does not matter how high a dealer bids, the seller will almost always want at least 10% more. And realizing this, some buyers keep their bids somewhat restricted so that they can pay a little over if and when the coins are offered.

As in the past, today, eye-appeal is of paramount importance. As much as some dealers want everyone to believe that certified coins are valued the same for identically graded coins, at best, this is only true over the telephone. When an actual buyer can view the two "identical" coins, he/she will almost always favor one over the other. This will most certainly remain the case in the coin business even if a homogenous market is truly developed.

In the area of commems, MS-63 and better gold continues strong at current levels. Very few coins grade 63 or higher and there is a large following for this short series. The silver commems are going through many adjustments, but the series, as a whole, remains very active at current bids. There is a long run of minus signs in the MS-64 column and MS-65's indicate some lower bids also. Even though bids have fallen somewhat, the new bids do represent actual buys from several dealers. And just because dealers have lowered their bids, this does not necessarily mean others are selling any cheaper.

Peace dollars continue stronger than ever, and even Morgans seem to be stabilizing gradually. The pluses and minuses appear to be about equal and, even more encouraging, the issues which have minus signs only dropped slightly this week.

U.S. gold is still one of the most active series, even if some bid levels fall. It seems there are always buyers waiting if someone wants to sell at under bid levels.

Type continues to search for a lower base for the majority of issues. This series appears awfully weak for the present.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted which resulted in a tightening of their grading standard. We will report 1986 papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 852-9216. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 80 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate
Previous years certificates will bring substantially less than bids.

The Certified Dealer's Choice

NUMISMATIC CERTIFICATION INSTITUTE

The Numismatic Certification Institute is recognized as the favorite independent grading service of thousands of collectors and dealers across the nation. Because while we're giving you buying confidence, we're giving you a lot more.

We offer "real-world" grading by widely respected experts such as Jim Halperin and Steve Ivy—grading based on the market that you're trading in everyday. And our authenticity opinions are insured for up to one million dollars.

How do we grade coins? It's no mystery. We follow the same standards as used by Jim Halperin in his book the *N.C.I. Grading Guide*, available to the general public.

What's more, our certificates feature detailed and accurate full-color photos of the obverse and reverse of each coin. And you'll get our certification within a 10-day turnaround. Guaranteed.

Of course, the fact that many dealers tell us that coins with NCI certificates sell faster may have something to do with our popularity, too.

Fill out the form below and try out NCI's wide variety of special dealer services. And discover why when it comes to top coin collectors and dealers across the nation, we're the certified choice.

NCI. The Certified Choice.

Long Beach Convention Will Showcase Future Activity

After perusing the latest population report from one of the PCGS dealers, it is a wonder why many dealers have lowered their bids on various rare coins which show less than 5 coins graded in MS-65 or better. It is quite understandable how bids fall to lower levels when one sees over 2000, MS-65 1881-S dollars having been graded, but, why would dealers drop their bids, quite substantially in some cases, for issues where only one or two coins have been graded? For example, in MS-65, an 1891-O has only two specimens certified. Yet, in December, bid was $4250. Now, bid is $3600. A simple explanation may be in order: There are very few collectors looking for high quality rare dates, signt unseen. This is something that should rectify itself over a period of time as it becomes more apparent how rare some of these issues really are in high grades. And being that collectors are not sight-unseen buyers, there are very few dealers who can afford that luxury without having a potential customer.

After the long run of minus signs last week for MS-64 and 65 silver commems, some dealers felt this series was about to soften. Such, does not appear to be the case. There are scattered plus signs throughout the charts, however, the best news is that this market is very broad. Numerous dealers are buying commems in all grades and most are well within current levels. And MS-66's are very easy to sell when they can be located. Gold commems continue to rise in the higher grades (MS-64 and better). Of course, we all know that very few coins make this illustrious grade.

Except for some minor adjustments, the Morgan dollar market seems to be firming up. There are many more buyers of common dates now than there were the last few weeks. MS-64's will bring $160-$175, while MS-65's are in the $380-$400 range. This week's Long Beach Show will "tell the tale" on whether these levels will hold or not. Peace dollars remain very strong in MS-63 and better.

Speaking of Long Beach, many dealers are preparing themselves for a very active show. Attendance is always good there and many dealers have been stocking up just for this show. A good number of dealers feel the market is reaching an overall base with support obvious in many areas (Commems, Mercuries, and almost anything 66 and better). The main areas of recent weakness, type and walkers, may still come down a little, but some dealers are definitely in the market for coins with eye-appeal for the specific grade. In other words, properly priced coins which have a little flair will sell quickly.

One of the things which has hurt the certified market of late is the *obligation* of PCGS dealers to offer bids on coins sight unseen. The sight unseen factor is an asset of the PCGS system because it makes for a liquid market. But, the obligation to make markets in specific areas means dealers will usually make conservative bids for the easier to locate coins. Obviously, after one year of operation, some coins have become less rare every week; that is, as more coins get certified in certain grades, dealers will lower their bids to match supply and demand.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 852-9216. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 80 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate. Previous years certificates will bring substantially less than bids.

Do you know what the highest buyers are paying for ANACS, NCI, or PCGS certified 1882-S Morgan Dollars? Or? ...

You would if you subscribed to *Certified Coin Dealer Newsletter* — The only certified newsletter that publishes updated prices for the most active areas of the market on a weekly basis.

The *Certified Coin Dealer* newsletter, published by the Coin Dealer Newsletter, is the newest price guide on wholesale levels of ANACS, NCI, and PCGS coins in various grades of Mint State and Proof.

The *CCDn* reports the highest known bids of actively traded coins, which have been certified by ANACS, NCI, and PCGS. At this time, the coins from these three grading services are the most widely traded.

The prices shown in the *CCDn* are based upon data from all major market makers in the certified coin segment. The publishers of the *CCDn* do not buy, sell or trade coins. In short, there are no persuasive forces that might distort the true market picture.

Since the early 1960's, the "Coin Dealer Newsletter" has been America's #1 wholesale numismatic price guide. The same publishers present America's premiere wholesale price guide for certified coins — a compilation of pricing data on all actively traded certified coins.

Subscribe today and get the most comprehensive price guide on the certified coin market.

Vol. II No. 8 February 20, 1987 Single copy price $3.50

Deeper Secondary Market Necessary to Stabilize Prices

Volatility has struck the certified (especially PCGS) rare coin market. We've seen this recently in the Morgan dollar market, but now it is occurring in the Walker series (MS-64 and 65) and with silver commems (the only real weakness in commems is in MS-64's). This has resulted from an apparent overabundance of coins having been dropped onto the marketplace with very few dealers needing to add to an already ample inventory. Thus, marketmakers are rapidly retreating their bids in order to stay under the higher buyers. This has happened so quickly that some bids have fallen as much as 25%. For some of the MS-64 walkers, bids fell so quickly that some MS-64's changed hands at less than MS-63 money only because the sellers wanted out of their stock and did not bother to check on MS-63 levels. This is why some of the MS-63 and 64 bids are so close together. Eventually, this will correct itself as 64's go back up, or, 63's come down a little.

Many dealers complain that the reason prices have fallen is because of a cash crunch in the industry. The Gold Eagle Program has been blamed for much of this. If this truly is the case, then one could reasonably expect the market in these oversold areas, to surge forward, once again, when dealers begin improving their cash flow as they sell their yet to be delivered proof gold eagles. However, there is an underlying reason for these particular issues being so volatile. And it may point out how other areas could go through the same phase. There is a definite lack of a *strong* secondary market for certified coins at this time.

The dealers have plenty of inventory. They need more investors and collectors to absorb the excess of new certified coins that come on the market monthly. Sure, there are buyers for all coins at some level, but, as more coins get graded they become less rare. As the more commonly graded coins travel in a circle among dealers, some coins will find a permanent home in the secondary market. However, the majority of these common coins just sit and become a glut on the market. Thusly, they seek lower levels. Obviously, the rarer coins will find the secondary market much quicker and bid levels will either remain steady, or, most likely, increase. This brings us back to an old law of numismatics: Those with the most *knowledge* about coins and their availability in grade will do better in a down market than those who try to market common coins as rare.

Despite the number of minus signs in some areas, the overall market appears moderately stable. There are enough collectors and investors out there who believe in a variety of issues that keeps the market turning. MS-63 and lower commems are stable at today's levels, while MS-65's (most issues) and MS-66's and better are doing very well. Gold commems are on numerous want lists also. Peace dollars remain strong, MS-63 and better, while MS-66 or higher Morgan dollars are very active. The rest of the dollar market is relatively stable at current levels, although, common dates in MS-64 and 65 fell slightly at Long Beach.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A nonprofit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 852-9216. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 80 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate. Previous years certificates will bring substantially less than bids.

Sight Unseen Silver Commems Lose Ground

Well, they've finally done it. The marketmakers have managed to depress bids on certified commems to the point where it appears to be a weak market. This is one of the most collectible areas of numismatics with a large following. Yet, the "sight unseen" bidding characteristic has managed to drag this series to lower levels. What does this mean to major commem dealers? If you call them, most will tell you they have not lowered their sell prices, in fact, they haven't lowered their buys, for most issues, however, their buy prices are for coins they can see first. This may give the appearance of a two-tiered market, which it is. Example: Sight unseen bid - $400; Sight bid - $500; Sight unseen sell - $450; Sight sell - $600.

To the uninformed, there appears to be a "not-so-close" $200 buy/sell spread. Yet, this may not be the case. "Sight unseen" is meant to make a more liquid, instantaneous market; not to guarantee bids will remain high. For competitive higher bids, the market seems to be saying, "Let me see the coin first." The certified bids seem to be accepted as the worst possible case, which means the individual bid represents a base price from which to work. This allows the client to know what his coins are worth "sight unseen," although they may be worth more to dealers after they see them.

Recently, there have been some rumors concerning people switching coins in PCGS holders. So, we called PCGS and the following is their statement concerning this situation.

"For the past 18 months PCGS has conducted a perpetual testing program for the security of its sonically sealed plastic holders. It is possible, though difficult and inefficient, to open PCGS holders. However, to our knowledge, it is impossible to reseal the holders without evidence of tampering.

"In addition, for the past four months PCGS has photographed every coin that it has graded. PCGS will continue to photograph 80% to 90% of the coins that it grades. That means if somebody could find a way to counterfeit PCGS holders or switch coins in PCGS holders there is a high probability that they would be caught. The civil and criminal consequences would be significant and PCGS would pursue the matter to the full extent of the law.

"It should be mentioned that virtually anything can be counterfeited. The fact that some gold coins have been counterfeited does not stop people from buying gold coins. The fact that $20 bills are sometimes counterfeited does not stop the local supermarket from accepting them. The rumor about "counterfeit" PCGS holders will not stop people from buying PCGS coins.

"If anyone has a coin which they suspect has been switched please send the coin to PCGS and we will verify the coin against our photographic file and if there is a problem we will trace the coin back to its source."

This should help answer those who have become concerned over these rumors. If you have any problems or questions concerning any of the grading services, they will be glad to discuss them with you. Their phone numbers are in their individual boxes.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 80 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate
Previous years certificates will bring substantially less than bids.

Do you know what the highest buyers are paying for ANACS, NCI, or PCGS certified 1882-S Morgan Dollars? Or? ...

You would if you subscribed to *Certified Coin Dealer Newsletter* — The only certified newsletter that publishes updated prices for the most active areas of the market on a weekly basis.

The *Certified Coin Dealer* newsletter, published by the Coin Dealer Newsletter, is the newest price guide on wholesale levels of ANACS, NCI, and PCGS coins in various grades of Mint State and Proof.

The *CCDn* reports the highest known bids of actively traded coins, which have been certified by ANACS, NCI, and PCGS. At this time, the coins from these three grading services are the most widely traded.

The prices shown in the *CCDn* are based upon data from all major market makers in the certified coin segment. The publishers of the *CCDn* do not buy, sell or trade coins. In short, there are no persuasive forces that might distort the true market picture.

Since the early 1960's, the "Coin Dealer Newsletter" has been America's #1 wholesale numismatic price guide. The same publishers present America's premiere wholesale price guide for certified coins — a compilation of pricing data on all actively traded certified coins.

Subscribe today and get the most comprehensive price guide on the certified coin market.

Vol. II No. 10 March 6, 1987 Single copy price $3.50

Common Walkers and Dollars Appear Near Bottom

The recently most active areas of the certified market seem to be stabilizing somewhat, especially the base price for the most common dates. As low as bids fell in MS-64 and 65 Morgan dollars and Walking Liberty halves, it is almost impossible to buy any substantial quantities on a regular basis. Therefore, one must realize that just because dealers lower their "sight unseen" bids, it does not mean coins will trade at those levels. The majority of dealers will not sell at those lower levels, moreover, most trades wind up taking place at something over the bid levels.

To reiterate what we have been saying of late, dealer bids are somewhat conservative so that they can protect themselves from buying too much of one item. Secondly, it protects them from any inconsistency in grading that may have occurred through happenstance. Thirdly, since this is still a relatively new concept, there are large numbers of some issues on the market which over a period of time must seek a proper level of value. This has caused this recent volatility, however, in the next couple of years there will be a more balanced trading mechanism in place which should lessen this volatility considerably.

Nevertheless, buyers and sellers almost always overreact when they search for the top and bottom of the market. When searching for the bottom of a market buyers will be conservative with their bids as they fear even further lower levels. At the top of a market, someone has to overpay, but until that point of realization, everyone is wheeling and dealing with liberal bidding as prices lurch forward almost on a daily basis. And when it stops, the mood turns conservative once again. For now, the certified market appears to be nearing a bottom. As fast as some areas fell, they can rebound just as quickly.

Obviously it takes quite a coin for PCGS to grade a Peace dollar better than MS-63. This being the case, the majority of dates are higher in MS-63 and better. In fact, every issue is higher in MS-66, and substantially, at that. Most dates are up at least $200 over last week's, CCDn. MS-65's are just about as sought after. The best news here is the fact that many dealers are involved in this bidding war.

Morgan dollars seem to be catching a little of this higher bidding fever. Of course, it hasn't hit the most common dates in MS-64 and 65 yet, however, many of the non-common to better dates show plus signs as bidding activity increases. Moreover, plus signs far outnumber minuses this week, for the first time in many weeks. This can be attributed to the fact that rarity is most important in grades above MS-63. In many cases, some of the rare 'O' mint dollars cannot be found above MS-63. The population report will bear this out over the coming years. And, even if one or two specimens can be found in the higher grades, it would probably spur activity by astute collectors and investors alike.

As strong as the certified commem market was, and as strong as the commem following is, it becomes apparent that no series is immune to bids dropping like a rock. It doesn't matter how rare some of these issues are, if the higher bidders lower their buy prices, then bids are going to fall. However, the most important thing to remember in this series and any other, is that a sight coin has more opportunity than a "sight unseen" coin.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A nonprofit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 80 authorized PCGS dealers who will send in coins for grading. These dealers and many more who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters and prooflike on dollars.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate. Previous years certificates will bring substantially less than bids.

Save As Much As 50% With NCI's New Dealer Discounts.

Now you can get NCI's expert grading for EVEN LESS! You'll pay only $10 each for NCI certificates on any coin with an owner stated value of $250 or less, with a minimum of 100 coins. And the savings to you are incredible.

Save ½ On Certification!

If you sent us 100 coins valued at $250 each, NCI certification would normally cost around $2,000. But with NCI's Volume Dealer Discounts, you'll only pay $1,000 – a savings of $1,000!

Still The Fastest.

Due to the enormous volumes that will be handled, we can't guarantee our usual 10-day turnaround for dealers using our Volume Discounts – but the average turnaround will be only 15 days, still faster than any other certification service.

The Same Expert Grading.

What's more, your coins will get the same expert grading that NCI is famous for, described in detail by grading authority Jim Halperin in his book *The N.C.I. Grading Guide.* That means "real world" grading that uses the standards of the daily marketplace to determine a coin's value.

Strike. Wear. Bagmarks. Luster. Eye appeal. Every possible factor is carefully considered in a proven process that's tough but fair.

Call Now!

NCI's Volume Dealer Discounts offer you more. Expert grading, the fastest turnaround. And all at savings up to 50%! Call Amy Dew NOW at **800-527-9250** so that you can start taking advantage of NCI's Volume Dealer Discounts today. And pay less for the fastest expert grading on the market.

MS-64 and Better "Short Set" Walkers Rebound

The majority of rare coin activity in certified coins is being done with PCGS coins rather than ANACS or NCI coins, or, any other grading service for that matter. The reason for this is because there are many more dealers that play an active day-to-day role in buying and selling PCGS coins than any other service. This constant activity is the reason prices fluctuate so much on a weekly basis. The "sight unseen" characteristic of PCGS is a built-in encumbrance that has caused the volatility in this market. The other services do not guarantee "sight unseen" bids so buyers have the option of viewing the coin before they put their money on the line. This should create less volatility with bids in the other services and could mean ANACS bids might be higher than PCGS bids because buyers of ANACS coins do not have to worry about buying a coin they do not want or like. In other words, lower bids in one service may not drag down bids in another service. However, the reverse may also be true, in that, higher bids in one service may not drive prices up in another service.

It seems that the PCGS market has hit a stone wall in its marketing efforts. There is a lack of a current marketing program which might remove a major portion of PCGS coins from dealers' inventories. Without a marketing program, the majority of these coins run full circle within the wholesale network. Some dealers have their own individual programs and do well with them, however, more coins come into the market on a monthly basis than are sold into portfolios. When this trend reverses itself, the whole market could move so fast that 1980 would look like a walk in the park.

One of the problems PCGS dealers are encountering as bid prices drift lower, is that their customers think they can buy coins at the bids levels. This cannot be the case on a consistent basis. Yes, a dealer can sell his coins at whatever price he wants, but if the dealer is a marketmaker (even if he isn't) he cannot survive selling coins to his customers at wholesale levels. One has to remember that these are "sight unseen" bids and are meant to be conservative. When the dealer actually views the coins he may be willing to pay 10% to 25% more for ones he particularly likes. If the customer then cherrypicks from the dealer he may have to pay a premium of up to 50% over bid. Moreover, since the dealer's bids are quantity bids, the customer cannot expect to buy the best coins and not pay a premium when there are other dealers willing to pay more than bid on a sight basis.

Walking Liberty halves are beginning to move up as dealers raised their bids on the majority of 1941 – 47 issues in MS-64 through MS-67. Minimum bid for MS-64 coins is now $155, while MS-66 and 67 issues continue very strong.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 80 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate. Previous years certificates will bring substantially less than bids.

INTRODUCING THE

NUMISMATIC GUARANTY CORPORATION OF AMERICA

Independent coin graders providing accurate and consistent grading services to a select network of coin dealers.

The NGC is a coin grading service that is designed to provide a select dealer network with the most accurate and consistent grading services available today. And grading will be all we do, we will not buy, sell or trade coins, or compete with our dealers in any way. Because of this policy, both you and your customers can be assured of accurate and consistent grading.

Don't miss the opportunity to become part of this important, unique dealer network. Membership is limited, so please write for your application materials today. Requests received after March 31, 1987 may not be honored.

Write: MR. JOHN ALBANESE
P.O. BOX 8
BEDFORD, NH 03102

All inquiries will be held in confidence.

MS-66 Dollars Becoming More Abundant

It is becoming increasingly clear that, even though coins graded above MS-65 are rare, there are inherent problems in the marketplace that are causing bids to fluctuate wildly. We are beginning to see bid levels fall on MS-66 dollars, commems (gold and silver), and recently in the type area, despite the fact that there aren't that many coins actually available. Just why are dealers dropping their bids on these normally elusive quality coins? There may be other reasons, but the most apparent ones are: 1. Availability of coins. 2. Grading. 3. Secondary market. 4. Cash flow.

1. Availability of coins – The larger the number of coins that get graded and then come onto the market, the more dealers are reluctant to be the high buyer and own a lot of coins of one issue or date. The problem is that the most common date will tend to drag down most of the others within a specific series. For example, the 1881-S dollar is the most available coin in MS-66 in the Morgan series. Yet, dealers not only drop their bid on it, but on many other issues also, because they feel the rest of the market will follow. This should not necessarily be true.

2. Grading – Since *all* coins are not an exact duplicate of another in quality, you will find some that appear better than others, although, they are graded the same, numerically. What will eventually take place is that the nicer coins will be taken off the market while the less appealing coins will circulate around the wholesale community. And the coins that circulate among dealers are the ones that cause the lower bid levels. Actually, this characteristic should not occur with MS-66's as much as it might with MS-65's or lower.

3. Secondary market – The collectors and investors are not buying nearly as much as the wholesale market needs in order to prosper. This relates directly to cash flow.

4. Cash flow – Inventories are much too large because of the lack of depth in the secondary market. The majority of dealers have their cash tied up in inventory, thus, leaving them to make very conservative bids.

The majority of Morgan dollars which bid under $2,000 in MS-66 have fallen this week as a result of lower dealer bids. Although a few transactions take place at these discounted levels, the majority of dealers keep their sell prices well above these bids (usually 30% or more). When coins are offered at discounts, they are usually limited to one or two of the more common dates.

MS-66 silver and gold commems are also retracing to lower ground. Despite the fact that there are very few gold commems available (especially MS-66's), there is a whole run of minuses as the high bidders have dropped their buy prices. This has such a negative effect that customers will think they can readily buy these coins at bid levels. This is certainly not the case and is proven regularly when one dealer will sell a particular coin to another dealer at 50% over the bid level. Single coin buys are usually much higher than the bid levels especially when the coins can be seen before they are purchased.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A nonprofit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 80 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate
Previous years certificates will bring substantially less than bids.

INTRODUCING THE
NUMISMATIC GUARANTY CORPORATION OF AMERICA

Independent coin graders providing accurate and consistent grading services to a select network of coin dealers.

The NGC is a coin grading service that is designed to provide a select dealer network with the most accurate and consistent grading services available today. And grading will be all we do, we will not buy, sell or trade coins, or compete with our dealers in any way. Because of this policy, both you and your customers can be assured of accurate and consistent grading.

Don't miss the opportunity to become part of this important, unique dealer network. Membership is limited, so please write for your application materials today. Requests received after March 31, 1987 may not be honored.

Write: MR. JOHN ALBANESE
P.O. BOX 8
BEDFORD, NH 03102

All inquiries will be held in confidence.

MS-66 Dollars Rebound After Temporary Setback

It appears that the overabundance of MS-66 Morgan dollars was about as fleeting as a blink of the eye. This week finds a long run of plus signs for a majority of the issues. There was some strong evidence that a 50+ coin lot of dollars had been graded by PCGS, thus causing many buyers to drop their bids. However, our sources report that most, if not all of the coins were 1881-S's. Not only that, but, the owner of these coins was offered over bid for all the coins. Obviously, this has helped to strengthen this market. In addition, the issues which show no bid change also have several buyers at these current levels.

The MS-65 Morgan series remains mixed with virtually an equal number of plus and minus signs. It does appear that the most common dates are firm at their current levels. Peace dollars remain quite strong in grades of MS-63 and better. In the MS-64 column many issues increased, just a few MS-65's rose.

One area that sees very little action, bidding-wise, is "Early Gold Type Coins." It is not because dealers aren't interested, but, that their bids are rarely successful. There are a very limited number of coins which actually fall into the mint state category for gold coins prior to 1840. This is the reason most dealers don't bother bidding in this area, however, when a specimen becomes available, it is usually sold to the first or second marketmaker contacted, at bid or more.

Buffalo nickels appear to be very strong in MS-64 and MS-65. The majority of issues are wanted at bid with some dealers willing to pay higher levels for several issues. The most popular issues are the mintmarked ones in the teens and twenties. Most of these were struck so weak that very few coins will be graded above MS-63.

This week finds several downward adjustments for MS-65 Walking Liberty halves. However, the minus signs are restricted to the 1941-47 issues. On a positive note, the 1940-47 dates, in MS-66 & 67 are still clamoring to new highs. The majority of these issues continue to climb at a 5% rate per week.

The idea of buying commems (MS-64 & 65) strikes fear into most dealers; and, as a result, they have lowered their buys on numerous issues. Some of the more commonly seen issues may deserve lower bids in their eyes, however, even hard to locate issues fall because dealers tend to over-react in a falling market and blanket their lower bids to include everything. What holds up the rarer issues? The fact that some dealers use their expertise and keep their bids solid on these issues. Another thought to keep in mind, some dealers will pay substantially more for many issues if they can see them before they commit to a price. In fact, many dealers make their bids read as follows, e.g., "sight unseen bid – $300, maybe more after seeing it."

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 100 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate. Previous years certificates will bring substantially less than bids.

Do you know what the highest buyers are paying for ANACS, NCI, or PCGS certified 1882-S Morgan Dollars? Or? ...

You would if you subscribed to *Certified Coin Dealer Newsletter* – The only certified newsletter that publishes updated prices for the most active areas of the market on a weekly basis.

The *Certified Coin Dealer* newsletter, published by the Coin Dealer Newsletter, is the newest price guide on wholesale levels of ANACS, NCI, and PCGS coins in various grades of Mint State and Proof.

The *CCDn* reports the highest known bids of actively traded coins, which have been certified by ANACS, NCI, and PCGS. At this time, the coins from these three grading services are the most widely traded.

The prices shown in the *CCDn* are based upon data from all major market makers in the certified coin segment. The publishers of the *CCDn* do not buy, sell or trade coins. In short, there are no persuasive forces that might distort the true market picture.

Since the early 1960's, the "Coin Dealer Newsletter" has been America's #1 wholesale numismatic price guide. The same publishers present America's premiere wholesale price guide for certified coins — a compilation of pricing data on all actively traded certified coins.

Subscribe today and get the most comprehensive price guide on the certified coin market.

CERTIFIED COIN DEALER newsletter

Vol. II No.14 April 3,1987 Single copy price $3.50

Sight—Premiums Sight Unseen—Base Prices

Several coin companies have reported that business has picked up substantially over the last couple of weeks. Of course, this cannot be considered a consensus, but it may be an indication that *knowledgeable* coin buyers feel that most bid levels have fallen to relatively secure numbers. Many clients are instructing their coin dealers to purchase, not sight unseen coins, but coins that can be seen and selected by both the dealer and the client. The knowledgeable buyer realizes that the sight unseen bidding serves as a minimum guarantee*, yet, it also serves to protect the dealer from having to purchase too much of one item. *(*This is for the benefit of the dealer and client, alike. The client knows the blowoff price of his coin and the dealer knows his downside if he needs to selloff excess inventory*). To realize full value or top dollar, the professional numismatist must view the coin before making his highest offer.

One of the most difficult facts to learn by the dealer's client is that in order to buy sight coins that appeal to both the dealer and the client, the client will have to pay a substantial premium over bid. This does not mean the dealer is going to make all of this premium as profit; he *cannot* buy sight coins on a consistent basis at sight unseen levels. He will have to pay more to cherrypick. This means the client will also. But, this is part of what the dealer is selling: His expertise—in buying and his ability to resell at a later date and realize the optimum for the client.

As a result of increasing activity in the investment sector of the rare coin market many prices appear to be steadier now than in recent weeks. There are still a large number of minus signs in most series (this is typical of a supply/demand market), however, they represent the more common issues which are seeking a rarity level. Of the over 6,900 bids listed in the CCDn, approximately 250 issues have minuses this week. This is less than 4% of the issues to the downside. This leaves over 6,600 issues at least stable to higher. Every series has some solid performers in various grades, while silver commems, Morgan dollars, and W.L. halves (MS-65's) still show various minus signs. Nevertheless, the number of minus signs appears to be dwindling as these issues reach a perceived proper level. When the most common issues reach their base level, there will be less of a tendency to drag down other issues.

This week finds the type market very steady at current levels. Both proof and mint state issues have fallen so much recently, that many issues are down as much as 50% from last year's highs.

Mint state gold type coins took it on the chin this week in MS-64 and lower grades. This was not so much as a result of discounted selling as it was a result of dealers just lowering bids because of being inventory heavy, although, not necessarily in gold.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A nonprofit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 100 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate
Previous years certificates will bring substantially less than bids.

Save As Much As 50% With NCI's New Dealer Discounts.

Now you can get NCI's expert grading for EVEN LESS! You'll pay only $10 each for NCI certificates on any coin with an owner stated value of $250 or less, with a minimum of 100 coins. And the savings to you are incredible.

Save ½ On Certification!

If you sent us 100 coins valued at $250 each, NCI certification would normally cost around $2,000. But with NCI's Volume Dealer Discounts, you'll only pay $1,000 – a savings of $1,000!

Still The Fastest.

Due to the enormous volumes that will be handled, we can't guarantee our usual 10-day turnaround for dealers using our Volume Discounts – but the average turnaround will be only 15 days, still faster than any other certification service.

The Same Expert Grading.

What's more, your coins will get the same expert grading that NCI is famous for, described in detail by grading authority Jim Halperin in his book *The N.C.I. Grading Guide.* That means "real world" grading that uses the standards of the daily marketplace to determine a coin's value.

Strike. Wear. Bagmarks. Luster. Eye appeal. Every possible factor is carefully considered in a proven process that's tough but fair.

Call Now!

NCI's Volume Dealer Discounts offer you more. Expert grading. the fastest turnaround. And all at savings up to 50%! Call Amy Dew NOW at **800-527-9250** so that you can start taking advantage of NCI's Volume Dealer Discounts today. And pay less for the fastest expert grading on the market.

Vol. II No.15 April 10,1987 Single copy price $3.50

Walkers Firm at Current Bids; 66's and 67's Vigorously Wanted

Walking Liberty halves, in all grades, appear to be very strong at today's levels. The very few minus signs are indicative of specific issues which appeared to be overpriced in relation to other dates and resulted from dealers selling them at lower levels. Nonetheless, the majority of dates have active buyers in all grades. Just about any date graded MS-66 or better can be sold on a wholesale basis at current bids or higher depending on how hard the seller wants to search for the highest buyer. The reason some buyers will pay more than bid for *one* specific coin is that he or she may need to fill a want list, whereas, the sight unseen bidder (PCGS) is obligated to take more than one specimen at his bid if the coin bids under $5,000. (PCGS marketmakers are required to buy a minimum of $5,000 worth of each specific coin for which they have a bid. Addendum: If the coin is bid $5,000 or higher, they only have to buy one). For example, bid on a 1942-D W.L. half, in MS-66 is $800. The dealer who is bidding $800, is obligated to buy seven coins at that level ($5,600) before he can lower his bid. However, the likelihood of someone having large quantities of specific dates in MS-66 or better is rather remote. And if someone did own a large group they would probably offer them as singles at higher levels to those dealers who need one or two coins for clients.

The various minus signs on the silver dollar page (page 3) are largely a result of discounted sells this past week. It is apparent that these sellers feel that these specific issues in grades are overpriced in relation to other dates. As time passes and more coins are graded and sold into the marketing system, the rarity relationship of one issue to the others will become more acknowledged and prices will adjust accordingly. Being that the pronounced overall marketing of certified coins is relatively new, it will take a certain amount of time for prices to reflect coincidental levels.

As compared to a year ago, the type market is considerably lower now and judging by this week's list of minus signs, most dealers feel many issues can go lower. However, one must keep in mind that the type bids are for the most common date of that specific series. In many series the overall number of coins available in a specific grade may be restricted to the most common issues. Therefore, a market may appear weak categorically, yet, the better issues may be doing very well. This may be a good time for the more knowledgeable dealers to educate their best clients on the rarity factor of better dates relative to common dates within specific series. It could be that the falling bids for common type may have caused the better dates to fall simultaneously because dealers felt the whole market was lower. How can a rare issue fall because a common date in the same series falls? Now may not be the bottom of the market in type, but it could be an ideal time to educate oneself on the better date coins and begin the search· depending on the rarity relationship, the search could be a long one.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A nonprofit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 100 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters and prooflike on dollars.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate
Previous years certificates will bring substantially less than bids.

Do you know what the highest buyers are paying for ANACS, NCI, or PCGS certified 1882-S Morgan Dollars? Or? ...

You would if you subscribed to *Certified Coin Dealer Newsletter* — The only certified newsletter that publishes updated prices for the most active areas of the market on a weekly basis.

The *Certified Coin Dealer* newsletter, published by the Coin Dealer Newsletter, is the newest price guide on wholesale levels of ANACS, NCI, and PCGS coins in various grades of Mint State and Proof.

The *CCDn* reports the highest known bids of actively traded coins, which have been certified by ANACS, NCI, and PCGS. At this time, the coins from these three grading services are the most widely traded.

The prices shown in the *CCDn* are based upon data from all major market makers in the certified coin segment. The publishers of the *CCDn* do not buy, sell or trade coins. In short, there are no persuasive forces that might distort the true market picture.

Since the early 1960's, the "Coin Dealer Newsletter" has been America's #1 wholesale numismatic price guide. The same publishers present America's premiere wholesale price guide for certified coins — a compilation of pricing data on all actively traded certified coins.

Subscribe today and get the most comprehensive price guide on the certified coin market.

Stronger Bullion Influencing Coin Market

Despite the fact that the majority of active bidders for certified coins have been quite conservative with their bids (*this has caused much of the weakness in the market*), there appears to be large volumes of business being done at levels above bid. For the most part, this is only logical as anyone who buys coins would like to see them before they put out their hard-earned money. Sight unseen bidding, generally in the area of PCGS coins, gives the buyer a certain amount of security in knowing a minimum value that his coin can be worth. Yet, the real world dictates that most sales among dealers take place at levels above bid for coins that can be seen prior to a sale being consummated. This being the case, the dealers' clients will obviously have to pay over the bid levels because that's the way clients (*collectors and investors*) buy coins – by viewing them first.

It appears that the overall market is nearing a level of cohesion. Most dealers are comfortable with the base bid levels (*with the possible exceptions of MS-65 W.L. halves and type coins in 61 to 65*), so now they can go about the business at hand of buying the specific coins they need according to rarity, value, and availability. This week's plus signs are largely a result of demand for coins which have limited availability. These coins will seek their proper level of value according to their supply just like the many issues which have faltered over the last few months due to their overabundance.

U.S. gold coins are very active in most mint state grades. Most of this activity is taking place at current bid levels or higher. In this kind of a market, bargain-hunters usually get leftovers, and even that, does not amount to very much. This is the main reason why so many dealers are participating at or near current levels, otherwise, they would have very little "new" inventory to show their clients. And the more this market heats up, the more impatient client's become – they do not want to feel like they are at the docks and the boat's already left.

MS-65 Buffalo nickels and Mercury dimes seem to be on many wantlists at today's levels. In fact, in most cases, even MS-64's are being sought. The earlier dates, prior to 1930, are the most active and mintmarked coins are rarely located. Moreover, many dealers offer long buy lists, while only an occasional specimen is even offered. Thus, a series being active may not necessarily mean coins are trading, it may only mean that dealers are actively seeking such specimens.

Type is the one area of the market which is not enjoying active bidding at current levels. No matter how rare a specific coin is, it seems that most visible marketmakers want to buy it "back of bid". This is having very adverse effects on bid levels. The one exception is copper coinage. Half cents through early Lincolns are enjoying crisp demand for mint state and proof 64 and better coins. Of course, most buyers want full-red specimens with no spotting.

The majority of issues within the commemorative and silver dollar series are holding firm. These areas may not be quite as active, but they do seem to have reached a level of support. The most common issues which drug these series to lower levels do not seem to be offered as readily at discounted levels as they were recently.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 100 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate. Previous years certificates will bring substantially less than bids.

Do you know what the highest buyers are paying for ANACS, NCI, or PCGS certified 1882-S Morgan Dollars? Or? ...

You would if you subscribed to *Certified Coin Dealer Newsletter* — The only certified newsletter that publishes updated prices for the most active areas of the market on a weekly basis.

The *Certified Coin Dealer* newsletter, published by the Coin Dealer Newsletter, is the newest price guide on wholesale levels of ANACS, NCI, and PCGS coins in various grades of Mint State and Proof.

The *CCDn* reports the highest known bids of actively traded coins, which have been certified by ANACS, NCI, and PCGS. At this time, the coins from these three grading services are the most widely traded.

The prices shown in the *CCDn* are based upon data from all major market makers in the certified coin segment. The publishers of the *CCDn* do not buy, sell or trade coins. In short, there are no persuasive forces that might distort the true market picture.

Since the early 1960's, the "Coin Dealer Newsletter" has been America's #1 wholesale numismatic price guide. The same publishers present America's premiere wholesale price guide for certified coins — a compilation of pricing data on all actively traded certified coins.

Subscribe today and get the most comprehensive price guide on the certified coin market.

More Active Dealer Bidding Leads to Higher Prices

The Central States Convention and a very active bullion market are coming at a very critical time. For nothing increases a dealer's confidence like stronger bullion prices. And, at this time of year, the summer doldrums normally set in. However, we've been in the summer doldrums all winter. The majority of dealers are poised and ready for an increase in activity. They have been refining their businesses in order to handle the new flood of business which is anticipated for certified coins – which appears primed. Nevertheless, the volume of business will increase as buyers take advantage of current levels that may be as much as 50% off of previous highs.

The dollar market is showing signs of strength as many marketmakers are backordered for MS-65 coins; common dates. Minimum bid has increased to $280, as they try to fill their orders. Most sellers are asking a minimum of $300-$325. So it appears that pressure is building which could force prices to higher levels. The 1881-S, which seems to lead the market in one direction or the other, is not being excluded as it had been recently. Previous buy lists would indicate "buying common date MS-65 dollars, except 1881-S." Now that it is not being excluded may be a positive sign. The rash of plus signs is an indication of the current strength of dollars in all grades except MS-64. This grade is the only weakness, and it is limited to only a few dates. The majority of other issues have buyers at current bids.

The silver commem market also appears to be gathering steam. We indicate very few downward adjustments this week, while plus signs number over 100. The MS-65 column is strengthening, especially for PCGS coins. Apparently, the overabundance of inventory is beginning to thin out somewhat, as buyers become more serious at locating coins at, or above, bid levels. Gold commems continue on many wantlists and the marketmakers will usually pay bid or more. Even those dealers who do not consistently run buy lists will offer to pay within 5% of bid.

The type market continues to be the least interesting to most dealers. However, a look at these columns does show numerous plus signs in most grades of mint state and proof. Many of the M.S. and PR-63 issues struggled to such low levels that they probably seem somewhat reasonable to these higher bidders. Copper seems to be very strong, but, dealers want high grade (64 and better) coins, full-red color, and no spots. If these conditions are met, they are more than likely going to pay over the bid levels. This is one area that takes true numismatic expertise in order to educate the potential client so that he may understand the many nuances of early copper.

Walking Liberty halves are finding strong support at current levels, in all grades. This may be one of the strongest areas of the market as the number of dealers actively buying coins expands, especially for issues dated 1934 - 47.

U.S. gold is very active in all mint state grades. Many issues have plus signs as inventories are getting low and discount sellers are few and far between. The marketmakers, with their higher bids, are buying the available coins, while the bargain-hunters sit back and wait for the market to slow...... they may have a long wait.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A nonprofit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 100 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate. Previous years certificates will bring substantially less than bids.

CERTIFIED COIN DEALER newsletter

Vol. II No.19 May 8,1987 Single copy price $3.50

Bidding Action Increases for Commems, Dollars, Gold, and Walkers

The certified coin market is definitely on the upswing. Just look at the plus signs as compared to minuses! Almost every series has a larger percentage of plus signs; and almost all grades are active. Where bid prices have not changed, there seems to be several buyers willing to pay right at bid levels, especially for Commems, Dollars, Gold and Walkers. A hot bullion market does not hurt either. Going into the Central States Convention, this is the hottest a bullion market has been in a long while. This has to be a positive sign for the dealers as they gear up for this major show.

The commem market (gold and silver) appears to be gathering much of the steam that it lost a couple of months ago. Many dealers are searching for MS-66 and better coins at current levels. Although, they frequently trade at much higher levels because sellers know demand is much stronger than supplies. In the area of MS-64 and 65 commems, a few marketmakers are the constant heartbeat of these grades. Judging by their bids and the issues which show increases, they realize that these particular issues are difficult to locate. For NCI graded coins, one major buyer is not finding enough coins at previous levels, so he has raised his bids substantially across the board for MS-64 and 65 silver issues. Whether these higher levels will bring out any ample supplies may be another issue.

The U.S. gold chart indicates many changes, with the majority of PCGS graded coins moving higher in MS-62 and better. This market has very strong support and even where minus signs appear, there are usually many buyers at or very near the new levels. MS-65 Saints have moved back up to $2,775 bid and many dealers are in at this level. MS-63 Saints are very active at $950. A strong St. Gaudens market is usually necessary for the rest of the gold market to be as strong as its current performance.

ANACS and NCI gold does not show many plus signs, but the most commonly traded coins are active at these levels. The number of minus signs in ANACS coins represents the higher buyers lowering their bids, but does not mean these coins are weak or plentiful.

Some of the strength that Peace dollars have shown is starting to rub off onto the Morgan dollar series. Common date Morgans are in strong demand for MS-64's at $135. The problem here is that sellers are at $150 and higher for quantities. The bidders at $135 can usually find very small quantities which do not meet their demand. MS-65's are now bid a minimum of $295 with several buyers wanting 100 coin lots. Again, sellers are asking $325 and higher. At $295-$310, one usually does not get a good mix of dates.

Walking Liberty halves are on numerous want lists in MS-64 and higher. The most active dates are 1934 to 1947. MS-64 and 65 bids are inching higher, while MS-66 and 67 coins will frequently bring prices in excess of bid levels. If one encounters the unusual MS-68 specimen, there are dealers with clients, both waiting in line for a shot.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 100 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters and prooflike on dollars.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate. Previous years certificates will bring substantially less than bids.

COMMITMENT

FUNDAMENTAL FOR SUCCESS

For many of today's numismatists coin collecting started at a young age with the discovery of a few 'old' nickels or pennies. As we grew older, the excitement of finding, trading and collecting coins stayed with us. Eventually, the hobby became a business and the business grew into an industry. But as an industry our standards have often been considered too loose for coins to be recognized as a serious investment option.

At the NUMISMATIC GUARANTY CORPORATION OF AMERICA, we are committed to advancing numismatics—both as a hobby and as a business.

This commitment goes beyond simply providing superior and consistent coin grading services to a select dealer network. In the coming months NGC will announce a series of unique, valuable and exclusive plans and programs designed to foster pride, professionalism and growth. Watch for details.

Central States: Dealers Say Goodbye To Market Bottom

The just completed Central States Convention must be considered a real confidence builder for those dealers in attendance. While the majority of numismatists across the country wonder when the market will undergo an aboutface, those attending the show reflect a keen awareness that we have faced the bottom of the market and sent it scurrying away. As evidence of this very fact, we have stated many times in past issues of the greysheet, when a market suddenly turns around, prices generally increase 20% - 30% psychologically. That is, coins that would only sell occasionally at bid levels in a weak market, are in heavy demand at bid and higher; suddenly, the sellers demand more for their product. This was the case at Central States (*this has been building over the last three weeks*), as MS-64 and 65 Morgans and Walkers took a dramatic turn to the upside. It was dramatic, in that, dealers realized demand outstripped the current supply.

MS-64 Morgans are now bid a minimum of $155, including the 1881-S. It appears that the once plentiful 81-S is no longer viewed as an outcast. In many cases, even some of the issues which are harder to locate are bid the same. This is probably a temporary situation as buyers are not too concerned over dates, they just need to fill orders. MS-65 Morgans are up to $350 bid, but, like the MS-64's sellers are reluctant to part with their stock. This is the main reason buyers have not been able to complete their orders, as sellers raised their ask levels in anticipation of an increase in business. Peace dollars remain stable at current levels with just a few minor adjustments.

Walking Liberty halves were almost as strong as Morgans at Central States, however, the number of buyers is not as deep, which is the reason they did not advance as much. Minimum bid for MS-64's is $165, with many sales taking place at the $180 level for some common dates (1941-47). The most common 65's are $240 bid, although, several dealers paid in the area of $275 at Central States. There are several plus signs in the MS-65 column. There were several instances of MS-66 specimens bringing over $900 each.

The commemorative market has retrenched and is indicating numerous plus signs in MS-64 and better. The number of active bidders was somewhat limited the last couple of months, causing bids to fall, but that number has increased and the number of actual buyers has always been a lot larger. Gold commems continue in a very strong manner. With the large number of dealers at the Central States Convention, one might expect to locate many types of coins to fill their want lists. However, this is an area which is not easily filled. Very few MS-63 and better gold commems could be found at this show, let alone, at reasonable levels.

U.S. gold was very actively traded this past week; mostly at higher levels. The $20 St. Gaudens is now bid at $965 in MS-63, $1,535 in MS-64, and $2,825 in MS-65. As long as this area continues to strengthen, along with dollars, walkers, and commems, the near-term will look that much brighter.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. A limited number deal sight unseen.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 100 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red brown) full bands on Mercury dimes, full head on Standing Liberty quarters and prooflike on dollars.

Certified Coin Dealer newsletter reports the national coin market for certified coins. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate
Previous years certificates will bring substantially less than bids.

MINT STATE TYPE COINS

Prices are for the most common dates.
If the coin you have will stand on its own merits without the grading authority and the CCDN bid is lower than the CDN, then refer to the CDN.

Save As Much As 50% With NCI's New Dealer Discounts.

Now you can get NCI's expert grading for EVEN LESS! You'll pay only $10 each for NCI certificates on any coin with an owner stated value of $250 or less, with a minimum of 100 coins. And the savings to you are incredible.

Save ½ On Certification!

If you sent us 100 coins valued at $250 each, NCI certification would normally cost around $2,000. But with NCI's Volume Dealer Discounts, you'll only pay $1,000 – a savings of $1,000!

Still The Fastest.

Due to the enormous volumes that will be handled, we can't guarantee our usual 10-day turnaround for dealers using our Volume Discounts – but the average turnaround will be only 15 days, still faster than any other certification service.

The Same Expert Grading.

What's more, your coins will get the same expert grading that NCI is famous for, described in detail by grading authority Jim Halperin in his book *The N.C.I. Grading Guide.* That means "real world" grading that uses the standards of the daily marketplace to determine a coin's value.

Strike. Wear. Bagmarks. Luster. Eye appeal. Every possible factor is carefully considered in a proven process that's tough but fair.

Call Now!

NCI's Volume Dealer Discounts offer you more. Expert grading. the fastest turnaround. And all at savings up to 50%! Call Amy Dew NOW at **800-527-9250** so that you can start taking advantage of NCI's Volume Dealer Discounts today. And pay less for the fastest expert grading on the market.

Demand Outpacing Supply In Fast Moving Market

The convention and auction schedule is going to keep the majority of marketmakers on an extensive travel schedule over the next few weeks. With the overall market becoming extremely active, most dealers will be moving fast and furious. The following is a list of some of the shows and auctions on this hectic schedule:

Georgia Numismatic Association	May 22 - 24
Mid American Auction (Georgia)	May 22, 23
San Diego Show	May 28 - 31
Superior Buddy Ebsen Sale (Beverly Hills)	May 31, June 1, 2
Long Beach Expo	June 4 - 7
Pacific Coast Auction Gal. (Long Beach)	June 4 - 6
Stack's Auction Sale (New York)	June 16 - 18
Bowers and Merena Sale (New York)	June 22 - 24

The bidding activity is generally increasing in all areas of the market. Not all grades are active, but where bids indicate increases, there is usually heavy competition. In many cases, transactions are not being consummated because sellers are staying just ahead of the marketmakers new higher bids. In order to actually buy coins in the series which appear to be strongest (dollars, gold, commems, and walkers), one must be prepared to pay substantially over the highest bids – usually 20% or more. Keep in mind, these are dealer-to-dealer prices.

Commemoratives are very active in MS-63 and higher grades. Gold commems are finding bidders extremely anxious to locate specimens. In some issues, bidders are raising their buy prices as soon as they see someone outbid them. Silver and gold commems, in MS-66 and better, have no problem finding new owners when they come onto the market. MS-63 thru MS-65 silver commems are attracting several new buyers at higher levels. Heavy inventories seem to have vanished.

Aside from a strong U.S. gold market, the Morgan dollar series is the most encouraging area of numismatics. Common date issues are moving to higher levels in MS-63 and better. Plus signs are scattered throughout the dollar charts, including Peace dollars. Minimum Bid for MS-64 Morgans is now $160. Base price for MS-65's is $375 and buyers will take 1881-S's at these levels. The one time oversupply of this date does not appear to be a problem at this time. As these bids increase, some of the better issues get lumped into common date bids. Eventually, those better issues will seek their proper level in relation to the most common issues.

The U.S. gold charts confirm another round of plus signs. Even early issues have bidders clamoring for the infrequently available issues prior to 1839 Saints continue to lead this hot series as supplies are not deep enough to satisfy demand. Since Saints are well off of their last year highs, in MS-64 and 65, it may take much higher levels before an adequate supply hits the market.

Walking Liberty halves are doing a pretty good job of keeping dealers attention. Increases may not be as large as with dollars, however, there are probably more coins changing hands in this series. Although demand is sufficient to handle the current supply of MS-63 to MS-65 coins, MS-66 and better specimens will usually bring well in advance of the high buyers' bids. Most of the activity takes place for issues dated 1936 to 1947.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A nonprofit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 100 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red brown) full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate
Previous years certificates will bring substantially less than bids.

BYERS NUMISMATIC CORPORATION

PCGS BUY PRICES – SIGHT UNSEEN

(ALSO SELLING: CALL FOR QUOTES)

- Prices subject to change, although we have honored *every* listed buy price so far.
- Highest prices paid for unusual, rare, high grade PCGS gold coins that are not on this list.
- PCGS coins on this list bought sight unseen. Call Mike or Mitch to confirm.
- Raw and papered coins bought at same prices. Conservative and accurate grading is essential; please notify us before shipping these coins on approval.
- Coins can be purchased confidentially if necessary.
- Please call to be added to our mailing list.
- Due to recent grading controversies, we reserve the right to return any coin overgraded *more than* one point by industry standards.
- Prices as of May 18, 1987. Please call for new buy prices before selling to the highest bidder.
- **We will pay more if we can see it first!**

CERTIFIED COIN DEALER newsletter

Vol. II No. 22 May 29, 1987 Single copy price $3.50

Common MS-65 Morgans Now Bid At Least $400; MS-64's — $185

If the just completed Georgia Numismatic Association Convention is any indication of how active the coin market is going to be over the next few months, fasten your seat belt and buy a bigger wallet! With all the auctions coming up and the Long Beach Convention beginning next week, the marketmakers are readying themselves for a fast ride. Higher bids are being registered so fast that many dealers tell us that they will buy the majority of coins on their want lists, at 10% to 20% over their current buy prices, when and if the coins become available.

The Mid-American Auction highlighted numerous certified coins (*PCGS*) and bidding activity was extremely furious for many rarities.

Denomination	Grade	Price Realized
1865 2¢ Piece	MS-65 (Red)	$1,980
1866 3¢ Nickel	PR-65	$1,485
1840 Half Dime	MS-66	$4,950
1863 Half Dime	MS-66	$4,070
1860 Seated Dime	MS-65	$2,310
1886-S Seated Dime	MS-65	$2,860
1892 Barber Dime	PR-65	$3,300
1865 Seated Quarter	PR-67	$11,550
1883 Seated Quarter	PR-66	$6,600
1892 Barber Quarter	PR-66	$6,875
1892 Barber Half	MS-65	$4,400
1920-D W.L. Half	MS-65	$4,950
1892 Morgan Dollar	PR-66	$8,525
1913 $5 Gold	PR-66	$34,100

As one can see by comparing bid levels, buyers are willing to pay well above bid for coins that suit their particular taste.

The overall market continues to indicate strength in all areas except for, possibly, type. In contrast to the auction results, the sight unseen bidding for PCGS type is very conservative, even for rare issues. Sales will actually take place at way over bid levels, when buyer and seller get together.

The dollar market is extremely strong for MS-64 and 65 common dates. Moreover, it continues to improve on a daily basis. Minimum bid is now $185 in MS-64 and $400 in MS-65 for PCGS coins. We have monitored some limited sales at $240 and $420, respectively. The dollar market is showing quite a positive trend as dealers ready for Long Beach.

Walking Liberty Halves are gathering many additional buyers to the already extensive list of marketmakers. Bidding is becoming so competitive and intense that buyers are resorting to outbidding the competition by as little as one dollar per coin. This occurs mostly for MS-64 graded walkers. A few of the really scarce dated walkers in high grade (*MS-67*) are seeing big price jumps e.g., 1935-D and 1941-S. However, no 35-D's have been graded above MS-65 and only one MS-66 1941-S has been graded by PCGS (*as of 4-1-87*).

Commemoratives are very steady at current levels with most issues easily saleable. ANACS coins are catching up to PCGS levels, but keep in mind, ANACS bids are for sight purchases. So buyers have the option of rejecting a coin if they feel it is not accurately graded.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986 by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 100 authorized PCGS dealers who will send in coins for grading. These dealers and many more who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate. Previous years certificates will bring substantially less than bids. NB - Represents no bid at this time.

CREDIBILITY

A GOAL THAT'S NOW A REALITY

As numismatics grew from a hobby to a business to a major industry, it became evident that its growth was limited because of a lack of investor confidence—a real credibility gap. Simply put, the investment community and the investing public has not felt confident in the consistency of the industry's grading. They therefore could not view investing in coins as a sound investment option.

We are pleased to announce that those days are now over. The NUMISMATIC GUARANTY CORPORATION OF AMERICA (NGC) has been formed to provide the industry with an independent, credible and superior coin grading service. Now dealers, collectors and investors can be confident that they will get consistent coin gradings, time after time.

And NGC plans on doing a great deal more. In the coming months we will be announcing a series of new plans and programs designed to foster the industry's pride, and promote professionalism and growth. NGC is committed to insuring that never again will our industry have a crisis in credibility—Now that's truly incredible.

Proof Gold Making Dramatic Gains

As the Long Beach Convention commences, all indicators point toward, not only a strengthening market, but, an overall upward trend which several dealers feel is the basis for the next couple of years. In conjunction with this up market, is the fact that dealers' checkbooks also appear healthier than they have been for quite some time. Not only that, but clients are beginning to spend more money on a wide variety of issues. Judging by the results of the Superior Auction (*Buddy Ebsen Sale*), all coins don't have to be certified to realize large sell prices. Everything from type to modern issues brought big numbers according to their actual grade. This may lead a new trend toward demanding original coins that are problem-free rather than bright coins that have been dipped-to-death. There is nothing wrong with bright coins, it's just that coins with original patina will tend to excite the knowledgeable numismatist that much more – this was in evidence at the Superior Sale. Watch for upcoming sales of other auction companies which have also attracted original consignments.

The recent Kagin's Auction, in San Diego, contained many certified coins. Most notably, an 1854 $1 gold TII in MS-65, which had been certified by PCGS, was sold at $33,000. The following coins were also certified.

Denomination	Grade - Service	Price Realized
1880-S Morgan	MS-64 P/L - PCGS	$308
1881-S Morgan	MS-65 P/L - PCGS	$660
1882-S Morgan	MS-64 P/L - PCGS	$374
1883-CC Morgan	MS-64 P/L - PCGS	$550
1885 Morgan	MS-64/65 - ANACS	$209
1902-S Morgan	MS-63/64 - ANACS	$561
1903 Morgan	MS-65/65 - ANACS	$660

An area that is sometimes overlooked because it is so rare and expensive is proof gold. However, the marketmakers that deal in this series are well aware of how difficult it has been to locate coins for the last couple of months. Most issues, in PR-64 or better, have been on want lists for several weeks now. In many cases, the bids are low compared to what the potential buyers are actually willing to pay. There are so few coins that fall into the upper quality categories, that competition creates a very strong seller's market.

As you will notice in this week's newsletter, plus signs abound for the majority of series. MS-64 and better commems (*gold and silver*) have a lengthy list of increases as various buyers are looking for quality coins. It appears that new buyers have entered the market and their resources are virtually unlimited.

The new buyers are not restricting themselves to only one series. Morgan and Peace dollars are as strong, if not stronger than any series in numismatics. In fact, dollars have more buyers at today's levels than most other series. Moreover the overall market appears to be broader in depth than it has been in some time. MS-64 and 65 dollars have more plus signs than they have for a long time. Minimum bid for MS-64 Morgans is now $195, while 65's will command at least $410.

MS-64 and better Walkers (*1934-47*), are extremely hot at higher levels. This market is also very deep at this time. This series is another example of a seller's market, especially in MS-66 and better. Transaction levels are usually 20% or more above current bids.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 100 authorized PCGS dealers who will send in coins for grading. These dealers and many more who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red brown) full bands on Mercury dimes, full head on Standing Liberty quarters and prooflike on dollars.

Certified Coin Dealer newsletter reports the national coin [illegible] for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate. Previous years certificates will bring substantially less than bids. NB - Represents no bid at this time.

MINT STATE TYPE COINS

Prices are for the most common dates.
If the coin you have will stand on its own merits without the grading certificate and the CCDn bid is lower than the CDN then refer to the CDN.

Save As Much As 50% With NCI's New Dealer Discounts.

Now you can get NCI's expert grading for EVEN LESS! You'll pay only $10 each for NCI certificates on any coin with an owner stated value of $250 or less, with a minimum of 100 coins. And the savings to you are incredible.

Save ½ On Certification!

If you sent us 100 coins valued at $250 each, NCI certification would normally cost around $2,000. But with NCI's Volume Dealer Discounts, you'll only pay $1,000 – a savings of $1,000!

Still The Fastest.

Due to the enormous volumes that will be handled, we can't guarantee our usual 10-day turnaround for dealers using our Volume Discounts – but the average turnaround will be only 15 days, still faster than any other certification service.

The Same Expert Grading.

What's more, your coins will get the same expert grading that NCI is famous for, described in detail by grading authority Jim Halperin in his book *The N.C.I. Grading Guide.* That means ''real world'' grading that uses the standards of the daily marketplace to determine a coin's value.

Strike. Wear. Bagmarks. Luster. Eye appeal. Every possible factor is carefully considered in a proven process that's tough but fair.

Call Now!

NCI's Volume Dealer Discounts offer you more. Expert grading. the fastest turnaround. And all at savings up to 50%! Call Amy Dew NOW at **800-527-9250** so that you can start taking advantage of NCI's Volume Dealer Discounts today. And pay less for the fastest expert grading on the market.

CERTIFIED COIN DEALER newsletter

Vol. II No. 24 June 12, 1987 Single copy price $3.50

Long Beach Show Features Higher Levels From Onset

At the beginning of the Long Beach Show, prices for commonly traded materials rose quickly. Dealers, afraid of not being able to fill orders, paid whatever it took to purchase MS-64 and 65 dollars and walkers. Initially, dollars were trading at $450-$475, for common MS-65's while MS-64's were in the $240 area. MS-64 Walkers traded around $200 for common issues with MS-65's over $325. As dealers began the process of filling orders, demand subsided somewhat at the higher levels and settled at this week's current levels. All in all, the market appears much stronger and dealers are gaining more confidence every day. It also appears that collectors and investors are satisfied that the market is in an up cycle and they are spending more freely.

Pacific Coast Auction Galleries, Inc. conducted a sale at Long Beach. It was very active with over 400 PCGS lots available. The following highlights are from this sale.

Denomination	PCGS Grade	Price Realized
1852 Three-Cent Silver	MS-64	$ 770
1873 Three-Cent Nickel	PR-63	$ 1,100
1807 Draped Bust Dime	MS-64	$10,175
1905 Barber Half	PR-65	$ 4,180
1902-S Morgan Dollar	MS-64	$ 688
1904 Morgan Dollar	PR-63	$ 2,090
1937 Antietam Commem	MS-65	$ 908
1925-S California Commem	MS-64	$ 528
1936 Delaware Commem	MS-64	$ 633
1937 Roanoke Commem	MS-65	$ 798
1936 Wisconsin Commem	MS-66	$ 1,018
1854 $1 Gold TII	MS-62	$ 7,700
1830 $2½ Gold	MS-64	$26,400
1875 $2½ Gold	PR-63	$14,850
1884 $3 Gold	PR-63	$ 8,250
1899 $5 Gold	MS-64	$ 3,520
1908-S $5 Gold	MS-62	$ 3,520
1901-S $10 Gold	MS-64	$ 3,905
1926 $10 Gold	MS-63	$ 1,980
1926 $10 Gold	MS-64	$ 3,960
1924 $20 Gold	MS-65	$ 3,410
1927 $20 Gold	MS-64	$ 1,870

MS-64 and better dollars are registering higher bids practically the length of the charts. Many more bidders are becoming involved which creates a heavier demand. This broader demand has a tendency to remove any surplus of common dates from the marketplace thus, justifying higher levels. Minimum bid for MS-64's is now $210, while MS-65's are up to $420.

Walkers seem to be just as strong as dollars, maybe moreso, for MS-66 and better Some of the late-date walkers in MS-66 and 67 have brought multiples of bid, especially the 'S' mints in the 40's, which normally come weakly struck. The issues which finds only one or two coins graded in these upper categories sees several buyers vying for these rare specimens.

Speaking of half dollars, at the Long Beach Show, a proof Franklin traded hands at $1,500. Of course, this one was special. It was a 1957, graded PR-68 by PCGS with a heavy frosted cameo. Coins like this seem to be able to rise above the ordinary and command prices in excess of imagination.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A nonprofit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 100 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value

PCGS identifies color on copper (red brown) full bands on Mercury dimes, full head on Standing Liberty quarters and prooflike on dollars.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate. Previous years certificates will bring substantially less than bids. NB - Represents no bid at this time

Enjoy a Coin Auction in the Comfort of Your Own Home

Participate in Teletrade's innovative new twice-monthly auctions featuring ANACS and PCGS certified coins. Bid at your own convenience after viewing coins on television, your own VCR or simply studying them on our Lot Listings. No travel. No mailbids. No paperwork. No delays.

Teletrade's auctions are fun and exciting because bidding is done right from your home over toll-free Wats lines. By simply entering the lot numbers you are interested in on your touch-tone phone you "hear" the current bid. By pushing a single button you become a bidder yourself. Bidding takes place between 1PM and 11PM on the day of the auction. Winners are announced ten minutes after the auction is over. Buyer's commission is only 7.5%

Teletrade now presents two auction formats a month:

1. Teletrade's video auctions. . .up to 350 lots at all price levels presented over cable (The Learning Channel), satellite and on videotape. Coins are enlarged to full screen size clearly detailing strike, surface condition and color. Videocassette costs less than you pay for a blank tape in a store. Lot listing only — $1.
2. Teletrade's "Builder" auctions. . . .non-televised auctions featuring certified coins with an estimated market value between $10 and $300. Lot listings are provided 5 days before the auction. Only $1 to participate. Not available on cassette.

TELETRADE AUCTIONS, 375 PARK AVENUE, NEW YORK, N.Y. 10022
1-800-223-5554 (In N.Y.) 212-355-5040

☐ Enclosed is $1 to participate in the next Builder auction. ($5 for 6).
☐ Enclosed is $7 to receive the videotape and participate in the next video auction ($25 for the next 4). Please circle: VHS or BETA
☐ Enclosed is $8 to receive the next Builder auction and the next video auction ($40 for 6 of each). Please circle: VHS or BETA

High Grade Peace Dollars Increasing With Intensity

Proof gold in 64 and better quality continues to prove how demand can force prices to much higher ground, especially when supplies are so limited. Even though they were made as presentation pieces, very few remain in their original state. Through improper handling or cleaning most specimens grade 63 or less. As time pushes forward, the PCGS population report may prove the validity of high grade rarity. In the meantime, those high bidders in competition with each other, are confident enough in this series that they continue to increase their sight unseen bids.

The Peace dollar series is proving to be a very lucrative market for those who could locate PCGS coins in MS-64 or better. This series was long overlooked, mostly because dealers had a difficult time grading them. Their popularity took a backseat to Morgans and their values remained relatively stagnant in comparison to Morgans. However, with the advent of PCGS, the Peace series has come into its own. This week finds almost every issue higher for MS-64 and better Peace dollars. If one owned a complete set in MS-64, it would be worth a minimum of $25,385. In MS-65, a set would bring at least $62,250, to the top marketmakers. However, if a complete set was assembled in MS-66, it would realize a phenomenal $97,050. Of course, at this time, this is impossible because all the issues have not been graded in MS-66. And if they were, they would probably bring well over $100,000!

The commem market, both gold and silver, remains active with many issues sporting plus signs in MS-64 and better. The market seems to have a good balance at current levels, with the issues wanted at higher levels usually being the more difficult ones to locate. Gold commems are attracting many buyers and the few coins available will hardly satisfy the strong demand.

The type market is showing evidence of increased dealer interest and plus signs can be found intermittently in the type section. The majority of action appears for mint state and proof 64 and better coins, although, many MS-62 and 63 PCGS graded issues are also getting attention. It appears that type coins are beginning to seek proportionate levels respective of their rarity versus the relative value of other issues. That is to say, low-mintage coins or series are moving ahead of common coins of equal quality.

Buyers for Walking Liberty halves, in MS-64 and better, are persistent. Demand remains strong at current levels with the majority of dates wanted at higher levels, in MS-65 and better. MS-67 bid prices jump on a weekly basis and only reveal a partial indication of true demand. Actually, most buyers will pay well over their current bids and they realize if they don't offer enough on the first shot, the coins will be sold elsewhere.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986 to grade and authenticate U.S. coins only. Located in Newport Beach CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 100 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value

PCGS identifies color on copper (red brown) full bands on Mercury dimes, full head on Standing Liberty quarters and prooflike on dollars. PCGS has established grading sets for most major series

CERTIFIED COIN DEALER newsletter

[illegible] CERTIFIED COIN DEALER NEWSLETTER [illegible] without written permission is expressly forbidden by law

PUBLISHER .... Ron Downing
EDITOR .... Dennis R. Baker
CIRCULATION & ADVERTISING .... Betty Morris
GRAPHICS .... Shane Downing

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

NEW HIGHER PRICES

PCGS BUY PRICES – SIGHT UNSEEN

(ALSO SELLING: CALL FOR QUOTES)

- Prices as of June 19, and subject to change, although we guarantee a sight unseen bid.
- Highest prices paid for unusual, rare, high grade PCGS gold coins that are not on this list.
- PCGS coins on this list bought sight unseen. Call Mike or Mitch to confirm.
- Raw and papered coins bought at same prices. Conservative and accurate grading is essential; please notify us before shipping these coins on approval.
- We reserve the right to return any coin 1) that is overgraded more than one point, 2) that has artificial surfaces (dipping acceptable), and 3) that has planchet damage (before, during, or after striking).
- **We will pay more if we can see it first!**

Peace Dollars Sustain Climb, Morgans Solid — Many Bidders

Many dealers seem to feel that type coins are in the early stages of a new extended run. The most common issues seemed to have hit near bottom and many are beginning to edge forward. Those issues which appear dormant, are in most cases, active at current levels. Some dealers may be leery of the more common issues, but, they realize from the recent population report that there are only so many coins available that can be sold into the market. However, until bid levels move to higher ground, most of those coins will not move from their temporary resting places.

MS-64 and better Peace dollars continue to climb at an unstoppable rate. At the rate some of these issues are increasing, it is obvious that some dealers feel they are nearly as rare as the 1934-S. The 1934-S has always been the key to the set. Yet, since refined grading has been instituted, it is apparent that there will be a shift in rarity order in the upper grades. The 1934-S may still be the rarest, but the price gap is closing quickly. With the recent increase in popularity of the Peace series, due to the realization of this rarity factor, many issues are just now reaching appropriate levels in relation to the rarity of other issues. How high this series goes, is strictly a function of supply because demand is present like its never been before.

Plus signs are scattered throughout the Morgan dollar columns as several dealers are trying to purchase specific coins for their customers. It appears that the base is broadening and more buyers are looking for a variety of dates. Most of the activity is taking place in MS-64 and better grades. However, there are a few plus signs in the MS-63 columns, although most changes for MS-63 or lower quality are to the downside. The base price for MS-65 Morgans has increased to $430 with most of the commons bid a little higher.

The Buffalo nickel series is relatively solid at current levels, yet, activity is somewhat restrictive. This is not for lack of interest, as much as a lack of supply of early dates (*pre-1930*) in high grades. The teens and twenties are especially difficult to locate, even moreso with mintmarks, above the 63 grade. There are several experts who will buy almost any date at current levels, because they have clients who realize most of these issues have inherent problems that keep them out of the upper grade categories. With this in mind, a few dealers have been quietly buying MS-63's, figuring most of the early issues are fairly nice specimens which the owners thought had a chance of being graded MS-64 or higher. This week indicates several plus signs in the MS-63 column for mintmarked issues prior to 1928.

Buyers are a little less anxious to buy MS-60 to MS-63 common issues of U.S. gold at recent levels. The number of minus signs in this week's issue accentuates this point. However, MS-64 and better material continues to thrive at today's levels, and in many cases, even higher. For the most part, the high grade material, since it is not available in quantity, will usually command well over bid levels.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A nonprofit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 100 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate. Previous years certificates will bring substantially less than bids. NB - Represents no bid at this time.

MINT STATE TYPE COINS

Prices are for the most common dates.
If the coin you have will stand on its own merits without the grading certificate and the CCDn bid is lower than the CDN then refer to the CDN.

CLEAR VISION

TOWARD A BETTER FUTURE FOR US ALL

For to long numismatics has been an industry whose growth has stopped far short of its true potential. Major obstacles to this growth have been the lack of critically needed support from the individual investor and the investment community.

The Numismatic Guaranty Corporation of America (NGC) has a clear vision of a better future for us all. It begins with the creation of a superior and consistent coin grading service designed to provide numismatics with credible and consistent grading, time after time. And, beyond this major advance, NGC plans on doing much, much more. That's why in the very near future you will be hearing and reading about our unique plans and programs that are designed to increase the industry's credibility and enhance its long term growth. Watch for details.

CERTIFIED COIN DEALER newsletter

Vol. II No. 27 July 3, 1987 Single copy price $3.50

Dollars, Type, Gold, Walkers, Generally Higher in 64 and Better

The silver dollar market continues to perform like days gone by, with two exceptions. One, Peace dollars are generally outperforming Morgans in MS-64 and better. This is principally because high grade Peace dollars are not in large supply. And two, not all dollars show continuous increases. In the past, when the market was hot, almost every issue would either go up, or, at the very least, stay the same. Rarely, would any issue fall. Now, however, some dollars may experience declines even though the series is in an upward trend. This may occur because an issue is overvalued in relation to other dates and supplies may be readily available. This old approach to a balanced market has been magnified by the certified market of which we will see more in the future.

Dealers seem to be concentrating in three additional areas, at the moment. Type, Gold (*including proof gold*), and Walkers are on most dealers' want lists. The majority of marketmakers are willing to pay over bid levels in order to purchase the coins they want. They realize this is necessary because competition is keen for these active issues.

Heritage Numismatic Auctions, Inc., recently conducted a four session sale which began in Dallas, on June 25th, and ended up in Newport Beach, on Monday, June 29th – a unique idea that was well attended. There were numerous PCGS and NCI graded coins in this sale. By the way, there were an unusually large number of upper-end NCI coins in this sale. The following examples are but a few of the highlights:

Denomination	Grade	Service	Price Realized
1803 Large Cent	MS-64/64	NCI	$ 5,940
1858 Flying Eagle Cent	PR-64	PCGS	$ 3,878
1837 Seated Dime no/stars	MS-65/65	NCI	$ 6,160
1796 Draped Bust Quarter	MS-64/64 P/L	NCI	$29,700
1834 Bust Quarter	MS-66/66	NCI	$11,000
1834 Bust Half	MS-64	PCGS	$ 2,860
1872 Seated Half	PR-64	PCGS	$ 1,980
1878-S Seated Half	MS-64/64P/L	NCI	$18,700
1891 Seated Half	PR-65	PCGS	$ 5,170
1921-S W.L. Half	MS-63/63	NCI	$ 6,875
1861 Seated Dollar	PR-65/65	NCI	$ 9,900
1875 Trade Dollar	PR-64	PCGS	$ 3,410
1854 $1 Gold	MS-67/67	NCI	$12,100
1924 $20 Gold	MS-65	PCGS	$ 3,465
1915-S $50 Gold Pan-Pac Round	MS-64/64	NCI	$42,900
1915-S $50 Gold Pan-Pac Oct.	MS-64/64	NCI	$29,150
1935 Connecticut Commem	MS-65	PCGS	$ 1,375
1938 New Rochelle Commem	MS-65	PCGS	$ 1,210

This sale featured a very rare gold proof set from 1875, although the coins were sold as individual lots. They were all NCI graded; together they realized $195,250. The $1 brought $29,150 – PR-65/65. The $2½ realized $12,100 – PR-64/64. The $5 hammered down $49,500 – PR-64/64. The $10 brought $63,800 – PR-64/64. The $20 knocked down $40,700 – PR-65/65.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A nonprofit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 100 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters and prooflike on dollars. PCGS has established grading sets for most major series

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

NUMISMATIC CERTIFICATION INSTITUTE

Save As Much As 50% With NCI's New Dealer Discounts.

Now you can get NCI's expert grading for EVEN LESS! You'll pay only $10 each for NCI certificates on any coin with an owner stated value of $250 or less, with a minimum of 100 coins. And the savings to you are incredible.

Save ½ On Certification!

If you sent us 100 coins valued at $250 each, NCI certification would normally cost around $2,000. But with NCI's Volume Dealer Discounts, you'll only pay $1,000 – a savings of $1,000!

Still The Fastest.

Due to the enormous volumes that will be handled, we can't guarantee our usual 10-day turnaround for dealers using our Volume Discounts – but the average turnaround will be only 15 days, still faster than any other certification service.

The Same Expert Grading.

What's more, your coins will get the same expert grading that NCI is famous for, described in detail by grading authority Jim Halperin in his book *The N.C.I. Grading Guide.* That means "real world" grading that uses the standards of the daily marketplace to determine a coin's value.

Strike. Wear. Bagmarks. Luster. Eye appeal. Every possible factor is carefully considered in a proven process that's tough but fair.

Call Now!

NCI's Volume Dealer Discounts offer you more. Expert grading. the fastest turnaround. And all at savings up to 50%! Call Amy Dew NOW at **800-527-9250** so that you can start taking advantage of NCI's Volume Dealer Discounts today. And pay less for the fastest expert grading on the market.

Higher Bids Monitored For Rarer Issues

Proof gold continues to be one of the most active areas of the rare coin market. Several major marketmakers try to outbid each other in an effort to acquire the available supply. The high bidders will not only buy certified coins at their bids, they will accept "raw" coins as well, as long as these coins meet their rigid standards. At these high levels, it is understandable that they will be unwavering in their demands for specific quality for the grade. This is a must because these marketmakers are not buying for inventory, but for clients who have very exacting standards.

One of the main reasons proof gold may be as strong as it is may be because of its low mintage. The highest mintage issue is the 1889 $1, with only 1779 pieces minted in proof. Of course, the survival rate in high grades decreases as quality increases. Moreover, the majority of issues have a mintage of less than 100 coins per date, with many issues having a mintage of only 20 - 30 specimens. As of the April 1, population report, only 460 proof gold coins had been graded by PCGS. Of those, a mere 291 graded PR-64 or better. A far, far cry from the thousands of MS-65 common date Morgans that have been graded.

Common date Morgans suffered a slight setback this week, in MS-64 and 65. MS-64's are now at $205, while MS-65's have fallen to $420 - $430. The most significant factor monitored this past week is that sellers are beginning to appear at these levels. Whereas, in the recent past, sellers kept their asking prices just out of reach of the high bidders. On a positive note, numerous plus signs do appear for MS-64 and higher graded, better date dollars. In this case, better dates meaning issues not considered to be the most common dates. And those issues without plus signs are on dealer want lists at current levels. In addition, several MS-64 and 65 proof like dollars are also in demand at higher bids.

The silver commemorative market continues to sparkle as numerous plus signs can be seen in the MS-64 and 65 columns. Dealers are being a little more selective as they prefer the lower mintage issues. The few minus signs in the MS-65 and 66 columns do not represent weakness in these issues, but are adjustments by dealers of their bids. The minuses do not represent sales of coins at lower levels, as sellers continue to want well above bids for infrequently available high grade coins.

Gold commems remain in strong demand, with many at higher levels, however, dealers are not meeting with much success at any level. Some of the past high bidders have withdrawn their active bids in hopes that they will be offered coins by sellers who feel the market may be slowing. This usually doesn't meet with much success either.

Higher bidders for U.S. gold seem to be concentrating on MS-64 and 65 quality coins. They presently feel that higher bids will bring out the specific issues they need for their customers. At this point, it seems like most dealers want to buy the same active issues. Therefore, the small availabilty and increased demand are forcing prices upward.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 100 authorized PCGS dealers who will send in coins for grading. These dealers and many more who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate. Previous years certificates will bring substantially less than bids. NB - Represents no bid at this time.

CREDIBILITY

A GOAL THAT'S NOW A REALITY

As numismatics grew from a hobby to a business to a major industry, it became evident that its growth was limited because of a lack of investor confidence—a real credibility gap. Simply put, the investment community and the investing public has not felt confident in the consistency of the industry's grading. They therefore could not view investing in coins as a sound investment option.

Those days are now over.
The NUMISMATIC GUARANTY CORPORATION OF AMERICA (NGC) has been formed to provide the industry with an independent, credible and superior coin grading service. Now dealers, collectors and investors can be confident that they will get consistent coin gradings, time after time.

And NGC plans on doing a great deal more. In the coming months we will be announcing a series of new plans and programs designed to foster the industry's pride, and promote professionalism and growth. NGC is committed to insuring that never again will our industry have a crisis in credibility—Now that's truly incredible.

Proof Gold Registers Stronger Bids

The "certified" rare coin market, has indeed, accelerated the process of liquidity for rare coins. For this progress we can all be thankful. It is the way to an expansive future. However, this past couple of weeks has emphasized how this "liquidity" tends to soften during the summer months. This is not the case in every series, yet, is more obvious as some bids fall off slightly while the majority of activity takes place at higher levels. For example, last week's CCDn indicated numerous minus signs in the area of MS-64 Walking Liberty halves. This occurred because the high buyers lowered their bids in anticipation of a slowing market. However, the market for Walkers has not slowed to any great extent (*quite to the contrary, this week shows several plus signs*), and sellers were able to move large quantities of common MS-64's at the $190/200 range.

So actually, what transpired was bidders were protecting their cash positions by lowering their bids, not wanting to increase their inventories, yet, as they wound up needing coins for clients, they found that they had to meet the seller's asking prices. In this case, anywhere from 15% - 20% over posted bid prices.

What are the reasons for restricting spending by dealers? There is one main reason for this action and that is, the majority of their clients are "vacationing," which means they are not buying as much as they were. All in all, dealers may lower their bids to safe levels, not wishing to tie up their funds in dormant material until clients are back in the market. However, as conservative as these bids may seem, it gives the market an appearance of weakness, when in fact, active transactions are taking place at much higher levels.

The dollar market appears to have slowed somewhat for common dates. There are some minus signs in the MS-64 and 65 columns. In addition, there appears to be buyers and sellers making deals right at the current levels. This has occurred for the MS-64's which bid $200 to $210, and the MS-65's which bid $420 to $450. Peace dollars in MS-63 and better are stable at current levels as supplies remain thin.

Very few changes have been monitored for commems as this series continues to increase its collector base. As the population report is updated more information is disseminated on the rarity of various issues by grade. As one can imagine, MS-65 and better gold commems are generally very hard to locate and asking prices consistently bear this out.

Proof gold continues to display many plus signs week after week. This material is showing growth patterns over the last three months which are normally exhibited over a ten to twenty year period. This does not mean that prices may not correct in the future, but for now, this market appears quite strong.

This week's changes in the type columns are mostly to the upside. Several dealers are picking their favorite issues and are trying to buy them at what they feel are quite reasonable levels. This market may be volatile between now and the end of August, when the ANA Convention convenes.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 100 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series

Do you know what the highest buyers are paying for ANACS, NCI, or PCGS certified 1882-S Morgan Dollars? Or? ...

You would if you subscribed to *Certified Coin Dealer Newsletter* — The only certified newsletter that publishes updated prices for the most active areas of the market on a weekly basis.

The *Certified Coin Dealer* newsletter, published by the Coin Dealer Newsletter, is the newest price guide on wholesale levels of ANACS, NCI, and PCGS coins in various grades of Mint State and Proof.

The *CCDn* reports the highest known bids of actively traded coins, which have been certified by ANACS, NCI, and PCGS. At this time, the coins from these three grading services are the most widely traded.

The prices shown in the *CCDn* are based upon data from all major market makers in the certified coin segment. The publishers of the *CCDn* do not buy, sell or trade coins. In short, there are no persuasive forces that might distort the true market picture.

Since the early 1960's, the "Coin Dealer Newsletter" has been America's #1 wholesale numismatic price guide. The same publishers present America's premiere wholesale price guide for certified coins — a compilation of pricing data on all actively traded certified coins.

Subscribe today and get the most comprehensive price guide on the certified coin market.

Commems and Buffaloes Move Higher; Early Walkers Active

The need for precision grading and the methodology by which this could be accomplished has been apparent since the early 1980's. Of course, some of this gained foresight is really hindsight, yet, the established grading services and those which may still come to fruition, are bringing about a professionalism that is absolutely necessary to the future of the industry. What needs to follow, quite obviously, is a strong measure of consistency that the investor market can believe in.

The list of changes in this week's CCDn is one of the most comprehensive since its inception. What has caused the increase in changes? Basically, it's because of the improvement and speed by which dealers are reporting their bids to the wholesale market. The timeliness with which dealers offer to buy or sell coins will have a dramatic effect on bid prices on a weekly basis. As the dealers adjust their bids according to inventory, bid levels will change more readily. An active, or up market will be easy to analyze by the acknowledgement of the plus signs.

On the other hand, minus signs may not always indicate a weak or declining market. Weakness may only be determined over a period of weeks through a series of minus signs. To better illustrate this situation one needs to look no further than the Morgan dollar series. There are numerous minus signs in the MS-64 and 65 columns, but these minuses represent nothing more than adjustments by the major marketmakers in their bid prices. In 95% of the negative issues, coins were not offered for sale at lower levels, dealers just trimmed their buy prices. Furthermore, there are many buyers at these current levels for the majority of issues. Therefore, this market remains quite active.

Just when it appears that the Peace dollar market may slow down, new higher bidders take the lead. Every MS-65 issue is higher this week, as is almost every MS-64. Dealers are making a concerted effort to stock up on this series. Even MS-63's are on want lists at higher levels. And if these three grades aren't hard enough to find, try and locate the ever-elusive MS-66. Many of these are bid higher, yet, this is almost a waste of time since there are practically none available.

The commemorative market continues in high gear. Many gold and silver issues are higher in MS-64 and better grades. Many of the MS-66's are almost impossible to locate, even if they have been graded. A few of the very rare issues have increased dramatically, such as, Grant with Star (50¢) MS-65 / $7,500, MS-66 / $10,000. Also, the Monroe, in MS-66 increased $800 to $5,000 bid.

After remaining somewhat quiet for the last few months, Buffalo nickels are beginning to realize some higher bids. Many Buffalo experts know how rare the early dates are (1916-27), however, until recently, bids have remained static. Not anymore. Plus signs are scattered throughout the MS-64 and 65 columns. Most issues have increased 5% to 10%. Nonetheless, sellers do not find these bids to be all that enticing. It may take much higher bids to bring out any substantial quantities of this increasingly popular issue.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible

PCGS

Professional Coin Grading Service: Established in early 1986 to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 100 authorized PCGS dealers who will send in coins for grading. These dealers and many more who deal in PCGS coins, will make sight unseen buys for PCGS coins PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red brown) full bands on Mercury dimes full head on Standing Liberty quarters and prooflike on dollars. PCGS has established grading sets for most major series

Certified Coin Dealer newsletter reports the national coin [illegible] only. Only the most active grading services are represented. CCDn uses every means available to ensure accuracy and completeness of the bid prices shown. Sight prices represent the highest known bids at press time and they are based strictly on dealer needs. Prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

CREDIBILITY

A GOAL THAT'S NOW A REALITY

As numismatics grew from a hobby to a business to a major industry, it became evident that its growth was limited because of a lack of investor confidence—a real credibility gap. Simply put, the investment community and the investing public has not felt confident in the consistency of the industry's grading. They therefore could not view investing in coins as a sound investment option.

Those days are now over.
The NUMISMATIC GUARANTY CORPORATION OF AMERICA (NGC) has been formed to provide the industry with an independent, credible and superior coin grading service. Now dealers, collectors and investors can be confident that they will get consistent coin gradings, time after time.

And NGC plans on doing a great deal more. In the coming months we will be announcing a series of new plans and programs designed to foster the industry's pride, and promote professionalism and growth. NGC is committed to insuring that never again will our industry have a crisis in credibility— Now that's truly incredible.

NUMISMATIC

CERTIFIED COIN DEALER newsletter

Vol. II No. 31 July 31, 1987 Single copy price $3.50

Active Bidding Typifies Certified Coin Market

Certain areas of the certified rare coin market are much more active than others. We will undertake a series by series analysis of the market as it appears today. This will encompass the various grades within a series also. This will be completed next week.

The commemorative market (*gold and silver*) is very strong in most grades. The lone exception may be in MS-63 silver commems where a few issues are occasionally offered at discounted levels with virtually no buyers at bid. However, the majority of MS-63's have active buyers at bid. In the MS-66 columns, about half of the silver issues are higher and almost all of the gold has increased. There is incredibly heavy demand for almost any issue in this top-notch grade. Many dealers are emphasizing the rarity value of some issues in that they just are not available in this grade. As such, a few bids have increased dramatically.

Morgan dollars may have the largest active following of any series. For the most part, MS-64 and higher grades are steady at bid and higher. Nevertheless, a few of the common issues have declined somewhat in MS-64 and 65. Like commems, MS-66 Morgans are in strong demand with several issues moving higher. The MS-63 and lower grades seem to be losing some of their attractiveness. This could be mostly a matter of their grading cost premium being discounted since they have been on the market now for a year and a half. In other words, if a $50 coin is sent through the system and grading costs of $25 are added to it, then it will have a temporary value of $75. As more coins increase in inventory, this grading premium tends to disappear and the value of the $75 coin will tend to seek its true level.

Peace dollar activity is constant when it comes to bidding, although, when coins are available they usually command well over bid levels.

Type coins seem to have a very limited following at this time. Most dealers are taking a wait-and-see attitude until it shows definitive signs of promise. However, there are still a few dealers who feel it is just a matter of time before this area explodes.

Speaking of explosions, proof gold continues in a very active state. Most issues keep climbing although a few will occasionally adjust downward. All grades of proof gold are attracting bidders.

Even the early gold, prior to 1840, is seeing some higher bidding in MS-64 and 65. This area usually does not get much attention because availability is very thin. However, some active bids could cause a few specimens to trade.

The most commonly traded gold type coins are another area that sees a lot of action. So much so, that prices tend to fluctuate more rapidly than most other series. This usually occurs for MS-60 thru MS-63 specimens. As grades increase, MS-64 and higher, less coins tend to trade and fluctuations tend to be less erratic. MS-66 and 67 coins are few and far between and readily saleable if offered near bid levels.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 100 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value

PCGS identifies color on copper (red, brown) full bands on Mercury dimes full head on Standing Liberty quarters and prooflike on dollars. PCGS has established grading sets for most major series

Certified Coin Dealer newsletter reports the national coin market on certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

GOLD COMMEMORATIVES

ANACS coins do not trade nearly as often as PCGS coins. ANACS bids are based on strict market standards and trade at these levels only on a sight basis.

Do you know what the highest buyers are paying for ANACS, NCI, or PCGS certified 1882-S Morgan Dollars? Or? ...

You would if you subscribed to *Certified Coin Dealer Newsletter* – The only certified newsletter that publishes updated prices for the most active areas of the market on a weekly basis.

The *Certified Coin Dealer* newsletter, published by the Coin Dealer Newsletter, is the newest price guide on wholesale levels of ANACS, NCI, and PCGS coins in various grades of Mint State and Proof.

The *CCDn* reports the highest known bids of actively traded coins, which have been certified by ANACS, NCI, and PCGS. At this time, the coins from these three grading services are the most widely traded.

The prices shown in the *CCDn* are based upon data from all major market makers in the certified coin segment. The publishers of the *CCDn* do not buy, sell or trade coins. In short, there are no persuasive forces that might distort the true market picture.

Since the early 1960's, the "Coin Dealer Newsletter" has been America's #1 wholesale numismatic price guide. The same publishers present America's premiere wholesale price guide for certified coins – a compilation of pricing data on all actively traded certified coins.

Subscribe today and get the most comprehensive price guide on the certified coin market.

CERTIFIED COIN DEALER newsletter

Vol. II No. 32 August 7, 1987 Single copy price $3.50

Increasing Number of Bidders Strengthens Most Areas

More and more dealers seem to be joining the ranks of the certified coin market. This increases competition for the available supply of graded coins in any given category. It also increases the depth of a particular market when the high buyer may be at $450 and a mere $20 separates the next five bidders. In time, this will eventually tend to tighten the buy / sell spreads in most major markets. This week, we continue with an analysis of each series which we began last week.

Under our "Better Date" heading, Lincoln cents are stable at current levels, although activity is not always busy. This is a highly specialized area which is directed more to collectors than investors. Nonetheless, it is a healthy market. Washington quarters in less than 65 are strictly a hit and miss proposition. There is not much activity here and buyers are few and far between. MS-65 coins do see consistent bidders, but this quality of coin is rarely encountered. The 1911-D $2½ gold and the High Relief are fairly consistent markets with a few strong bidders who seem to always be right near bids.

Buffalo nickels have just recently begun to move to higher levels in MS-64 and 65. Most of these increases usually take place for mintmarked coins from 1913 to 1928. Buff experts realize that not many coins can be located in these upper grades. Therefore, it would be rather difficult to be overstocked in many issues. The MS-63 market appears stable near current bids.

The Mercury dime series appears quite stable for flat - band specimens in MS-64 and better. However, many full - band issues are weaker and sport minus signs as sizable quantities become available. Full - band MS-65 coins may not be as plentiful, yet, this market still appears sluggish. Marketmakers seem afraid to step to the forefront with higher bids. As such, occasional specimens are offered at discounted levels.

Walking Liberty halves remain one of the most actively bid series in numismatics. Their popularity seems to increase weekly. MS-62 to MS-64 quality coins are stable at current levels with a few minor adjustments in MS-64. The MS-65 area finds sporadic changes, usually pluses, while MS-66 and 67 coins continue to show gains. The entire series, from 1916 to 1947 is easily saleable in this upper crust quality. The early Walkers are beginning to show signs of positive movements according to their true rarity by grade.

The proof singles market is extremely active for coins in 65 and better. The way these bids keep increasing it is obvious that most dealers do not feel the average proof set has any 65 or better coins in it. It takes an exceptional proof coin to grade at least 65, with no hairlines, or spots of any kind. And to reach a higher plane of excellence, a coin must have a lot of flash. The two most popular coins in this area are Mercury dimes and Walking Liberty halves. Of course, as many dealers agree, these are truly magnificent coins when seen in these ultimate grades. Although, even the other denominations can be spectacular in high grades.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 100 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

CERTIFIED COIN DEALER newsletter

Vol. II No. 33 August 14, 1987 Single copy price $3.50

Market Activity Responsive To Upcoming ANA

Many of the certified coin marketmakers have reported a definite upswing in business. It appears that their clients are updating their want lists in anticipation of the upcoming ANA. As standing orders increase, it tends to reason that business will expand as long as sellers are willing to part with material at somewhat reasonable levels.

The dollar market continues to lead certified bidding activity. In well over 90% of the various Morgan categories (*PCGS graded*), bidders are trying to buy coins at bid or higher. The only things that stops most transactions from occurring are sellers are asking well in excess of bids, or, the material is just not available. The latter is the case in many instances of MS-66 and 67 issues, mainly because very few, if any, have been graded. And in some cases, bids have jumped substantially, of late, for this reason. Some of these issues are temporarily unique. Only time will tell if the terminology will be changed to unique without the use of the qualifier *"temporarily."*

As strong as Peace dollars are, some dealers are beginning to be realistic in their expectations. It is apparent that higher bids do not necessarily mean dealers can buy MS-64 or better coins. Supplies are very thin and the majority of sellers are in a holding pattern or demand way over bid for their coins. Some dealers are resorting to bidding for coins in MS-63, chiefly because more supplies are available and MS-63 is still a nice quality coin. With this in mind, most of the MS-63 issues are higher this week.

Commemoratives remain very active at current levels with several issues moving higher. MS-66 coins continue in strong demand. Gold commems have exercised another series of plus signs as buyers attempt to locate specimens.

Gold type coins have a very strong following and even when prices fall somewhat, activity remains heavy. This is probably one of the best examples of free market activity in the rare coin business. Prices move according to supply and demand, yet, if prices fall too much it seems someone jumps in to take advantage of lower prices. When supplies thin, prices tend to inch forward.

The type market is still in a confusing state as some rarer issues are bid lower than their more common counterparts. This is due to the fact that dealers are laying off of some rare issues because they know they are not available, while they actively bid for common coins because they are marketable. This situation will correct itself in time, and when it does, the rarer issues will probably outdistance the common issues.

Walkers spent kind of a quiet week, while most of the MS-65 to 67 issues remain unchanged. A few MS-64 issues fell slightly due to discounted sells. This occurred with several common dates in the 1941-47 series.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 100 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red brown) full bands on Mercury dimes, full head on Standing Liberty quarters and prooflike on dollars. PCGS has established grading sets for most major series

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

CLEAR VISION

TOWARD A BETTER FUTURE FOR US ALL

For too long numismatics has been an industry whose growth has stopped far short of its true potential. Major obstacles to this growth have been the lack of critically needed support from the individual investor and the investment community.

The Numismatic Guaranty Corporation of America (NGC) has a clear vision of a better future for us all. It begins with the creation of a superior and consistent coin grading service designed to provide numismatics with credible and consistent grading, time after time. And, beyond this major advance, NGC plans on doing much, much more.

By now you've probably heard or read about some of our plans and programs designed to enhance the industry's credibility and growth. Keep watching, there's much, much more to come.

NUMISMATIC

Vol. II No. 34 August 21, 1987 Single copy price $3.50

Top Quality Issues Under Extreme Bidding Pressure

Most dealers are readying themselves for what they hope will be their most active show of the year. The ANA runs from August 26th thru the 30th, with PNG Day actually opening the convention on the 25th. As a result of all the pre-convention activities, most dealers are preoccupied with organizing their want lists and boxes of inventory, thus, bidding activity has slowed considerably. However, for the most part, bids have remained stable.

This consistency is due, in large part, to two main facts. First, most sellers will not sell the majority of their inventory at discounted levels. They want prices in excess of bid levels. Only in limited cases will they sell coins at bid or less – usually for very common coins where large quantities have been graded. Second, consistent or higher bids are easy to maintain for rare issues. Rare in this case refers to specific issues in various grades where very few coins have been graded. It is easy for a dealer to raise his buy prices for unique coins which he is not likely to encounter. (*And it may be risky to overpay for temporarily unique coins, which may increase in quantity in the near future*). More on this in a future article.

Type coins are receiving much more bidding among the marketmakers, and generally speaking, the majority of issues are higher in all grades. The plus signs are not limited, in that, they can be found in all listed grades of mint state and proof. Rarity is becoming more of a factor as dealers are looking for, not only top quality, but better dates, as well. As the certified market expands over the coming years, a more pronounced market will develop for rarities. Then we may see the first million dollar U.S. coin to sell at auction. Which auction company will it be?

Although proof gold has increased so much over the past few months, this series continues steady in most grades. There are a few bid adjustments to the downside, however, most changes are on the upswing. In the most recent PCGS Population Report, July 1st, there have been 573 U.S. gold type coins graded PR-60 or better, however, only 138 have been graded PR-65 or better. In either case, quantities aren't that substantial.

Peace dollars remain on want lists with most issues higher in MS-65 and 66. One can almost name their own price for most MS-66 specimens. While MS-65's did not register as many plus signs, bidding remains highly competitive.

The majority of common date Morgan dollars have retreated slightly in MS-64 and 65. The 1881-S is now bid at $190 and $370, respectively. The majority of other commons are just above those levels at $200 and $400. Several issues in MS-66 have increased as dealers combine quality with their demand for rarer issues.

Quality coins are really paying dividends, (*only if you own some*), as Buffalo nickels, Mercury dimes, and Walking Liberty halves are registering higher bids in MS-66 and MS-67. Obviously, not many coins have been graded in these top-notch categories, but when they are available, they are easy to sell. Another area where this occurs is in proof singles, 1936 and later, where buyers are also competing very strongly for 65 and better quality coins.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 100 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value

PCGS identifies color on copper (red, brown) full bands on Mercury dimes full head on Standing Liberty quarters and prooflike on dollars. PCGS has established grading sets for most major series

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

GOLD COMMEMORATIVES

ANACS coins do not trade nearly as often as PCGS coins. ANACS bids are based on strict market standards and trade at these levels only on a sight basis.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate. Previous years certificates will bring substantially less than bids. NB - Represents no bid at this time.

Vol. II No. 35 August 28, 1987 Single copy price $3.50

Overall Market Looks Poised For Future Upward Movement

Bidding activity on the teletype machines has been a little sparse this past week as most dealers attend the Atlanta shows and auctions. This week of activities culminates with the ANA Convention lasting through Sunday the 30th. Although the teletypes are relatively quiet, bids, for the most part, are stable to higher. Dealers are actively seeking most certified coins if priced according to their true value. In general, MS-63 and lower grade coins will trade nearer to their bid levels than will coins graded MS-64 and higher. Logically, this makes sense, because there are more coins available in the lower grades than in the higher grades. Also, the higher the grade, the higher the bid, which means, if a dealer works on a fixed percentage, he will make more money on a higher grade coin.

The Mid-American Auction, in Atlanta, contained numerous lots of certified coins. Probably, the most important piece was the 1895 Proof - 67 Morgan, graded by PCGS. The coin realized $66,000. The following list of highlights were taken from this sale.

DENOMINATION	GRADE	SERVICE	PRICE REALIZED
1899 Indian Cent	MS-67 Red	PCGS	$ 2,888
1865 Three Cent Nickel	PR-63/63	ANACS	$ 1,045
1853 Seated Dime	MS-66	PCGS	$ 5,280
1915-S Buffalo Nickel	MS-66	PCGS	$ 2,860
1908 Barber Quarter	PR-66	PCGS	$ 6,050
1877 Seated Half	MS-65	PCGS	$ 4,730
1879-S Morgan Dollar	MS-65/65	ANACS	$ 605
1880-S Morgan Dollar	MS-67/65	ANACS	$ 990
1882-S Morgan Dollar	MS-65/65	ANACS	$ 660
1897 Morgan Dollar	MS-65/65	ANACS	$ 688
1901/0-S $5 Gold	MS-65	PCGS	$ 9,900
1908-D $20 Gold W/M	MS-67	PCGS	$23,100

This week finds the Morgan dollar market firm for the majority of issues with the common MS-64 and 65 issues actually showing positive movement. After last week's weakness in common dates, most dealers are relieved to see the market generating some support at higher levels.

Peace dollars are generally stable at current bids, although a couple issues have fallen in MS-64. The 1923-P ($270), and 1925-P ($340) have retreated slightly. The MS-65 and higher grades are still difficult to come by; they will command well over bid levels.

Although changes aren't running rampant, the type market continues to show improvement. Almost all bid changes are to the upside for '64' and better quality coins. Additional dealers are beginning to join those who are already in this market at current levels.

The majority of proof gold is steady in all grades, however, a few specific issues, in 64 and higher, have fallen due to the marketmakers lowering of their buy prices.

Gold and silver commemoratives are on many shopping lists at the Atlanta shows. There is not an overabundance of 65 and better material, except in not-so-rare cases, and some of those harder-to-locate issues have increased. Even in MS-64, some of these issues cannot be found. Most gold issues will move rather quickly if they are priced anywhere close to their bid levels.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A nonprofit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 100 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value

PCGS identifies color on copper (red, brown) full bands on Mercury dimes, full head on Standing Liberty quarters and prooflike on dollars. PCGS has established grading sets for most major series

MINT STATE TYPE COINS

Prices are for the most common dates.
If the coin you have will stand on its own merits without the grading certificate and the CCDn bid is lower than the CDN then refer to the CDN.

NUMISMATIC CERTIFICATION INSTITUTE

Save As Much As 50% With NCI's New Dealer Discounts.

Now you can get NCI's expert grading for EVEN LESS! You'll pay only $10 each for NCI certificates on any coin with an owner stated value of $250 or less, with a minimum of 100 coins. And the savings to you are incredible.

Save ½ On Certification!

If you sent us 100 coins valued at $250 each, NCI certification would normally cost around $2,000. But with NCI's Volume Dealer Discounts, you'll only pay $1,000 – a savings of $1,000!

Still The Fastest.

Due to the enormous volumes that will be handled, we can't guarantee our usual 10-day turnaround for dealers using our Volume Discounts – but the average turnaround will be only 15 days, still faster than any other certification service.

The Same Expert Grading.

What's more, your coins will get the same expert grading that NCI is famous for, described in detail by grading authority Jim Halperin in his book *The N.C.I. Grading Guide.* That means "real world" grading that uses the standards of the daily marketplace to determine a coin's value.

Strike. Wear. Bagmarks. Luster. Eye appeal. Every possible factor is carefully considered in a proven process that's tough but fair.

Type Market Moves Higher, Common Date Dollars Tumble

The Atlanta ANA proved to be very active for the majority of the dealers in attendance. In general, type coins were very strong in most grades, while almost anything in 66 or better commanded much attention and brought high prices when buyer and seller could get together. However, an event such as the ANA, with so many active participants from all over the country in one place, dramatizes the volatility of the certified coin market. In this case, common date dollars, both Morgan and Peace, virtually collapsed in MS-64 and 65. This took place in a matter of a few days, however, it seemed like it took only a matter of minutes to spread over the expanse of the gigantic hall where the show was located. The only reason bids have not registered much lower levels is because of a few stragglers whose bids have not yet been withdrawn, but will be filled by the time you read this. Thus, the overall trend is downward for the time being and to what degree bids fall shall be seen over the next couple of weeks. Please check page three for the specific issues involved.

All indications point toward higher levels in the area of type coins. As plentiful as common date dollars appeared to be at ANA, type coins seemed short of supply. Most type marketmakers reported sales were brisk and many times coins sold from one dealer to another, then another. This is always an encouraging sign that dealers watch for at a major show.

Proof gold was very active, although the chart on page four indicates many minus signs. Most buyers feel that the new levels are more realistic, and even the sellers are happy with the prices they received for their coins. This area continues to be one of the most active, even though a very small percentage of the dealers actually do the bulk of the buying and selling.

Commemoratives were a bright spot at ANA. Many dealers were very active with this series at or near current bids. Nevertheless, there are several minus signs this week, but they are primarily a result of adjustments dealers have made with their buy prices. A very few of the common issues have fallen due to discounted sells.

Gold commems continue to test higher levels. There are so few coins available in MS-63 and higher, that owners can just about name their price – and get it.

Mint state gold was an area that may have suffered a little from overexposure. MS-60 to MS-63 coins were in strong supply and a few of the more common issues have fallen as a result, however, this was a very active market. It is interesting to note that with the increase in popularity of certified coins, also comes a more active down market. In the past, with raw coins, when an area of the market turned downward, it was difficult to sell those specific issues at any level. Now, however, the weak issues, if they are certified, seem to seek a proper level quickly, and begin trading, once again.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $20 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $6 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 100 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value

PCGS identifies color on copper (red brown) full bands on Mercury dimes, full head on Standing Liberty quarters and prooflike on dollars. PCGS has established grading sets for most major series

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

NUMISMATIC CERTIFICATION INSTITUTE

Save As Much As 50% With NCI's New Dealer Discounts.

Now you can get NCI's expert grading for EVEN LESS! You'll pay only $10 each for NCI certificates on any coin with an owner stated value of $250 or less, with a minimum of 100 coins. And the savings to you are incredible.

Save ½ On Certification!

If you sent us 100 coins valued at $250 each, NCI certification would normally cost around $2,000. But with NCI's Volume Dealer Discounts, you'll only pay $1,000 – a savings of $1,000!

Still The Fastest.

Due to the enormous volumes that will be handled, we can't guarantee our usual 10-day turnaround for dealers using our Volume Discounts – but the average turnaround will be only 15 days, still faster than any other certification service.

The Same Expert Grading.

What's more, your coins will get the same expert grading that NCI is famous for, described in detail by grading authority Jim Halperin in his book *The N.C.I. Grading Guide.* That means "real world" grading that uses the standards of the daily marketplace to determine a coin's value.

Strike. Wear. Bagmarks. Luster. Eye appeal. Every possible factor is carefully considered in a proven process that's tough but fair.

Call Now!

NCI's Volume Dealer Discounts offer you more. Expert grading. the fastest turnaround. And all at savings up to 50%! Call Amy Dew NOW at **800-527-9250** so that you can start taking advantage of NCI's Volume Dealer Discounts today. And pay less for the fastest expert grading on the market.

Better Date Morgan Dollars Contradict Current Trend

The certified coin market is undergoing quite a series of changes. As pricing information becomes more readily available, bids will have a tendency to fluctuate more rapidly. The one drawback to this may be the inability to positively identify the ultimate direction of a particular series on a consistent basis. In the past, if a series such as dollars began to fall, one could be fairly certain the market was headed downwards for awhile. Now, information is instantaneous from so many sources, that dollars could be up one week, down the next, then up the next. It will take several weeks to actually determine a directional trend. Although, in today's market, this instantaneous information is more valuable, in that, dealers will be able to identify weak areas much quicker.

This has been the case with Morgan dollars for the last three weeks as common dates continue to fall in MS-64 and 65. Several dates are now bid under $170 and $400, respectively. And the majority of bidders are well back of these levels, but a few bidders are still willing to buy at these current levels. In today's market it is easy to determine the short-term trend, however, this could turnaround at any time. The main cause of this weak market may be a characteristic that occurs at almost any major coin show. When a lot of dealers get together with a lot of inventory, the most generic coins will be the most available. Those will be common date dollars and walkers in MS-64 and 65. It's not difficult to figure what could happen to bid levels when thousands of coins are available in one place and dealers want to sell their most common coins. Downward pressure. Nevertheless, at some point, the astute buyers step in and begin to buy all they can find at these low levels.

Better date dollars continue to thrive as bidders try to purchase anything that becomes available in MS-64 or better. Of course, most sellers will want in excess of bid levels before they will be relieved of these seldom found issues. Keep in mind, that some MS-66 bids (*in some cases increase more than 10%*) are somewhat useless as no coins have been graded in such high regard. Therefore, bids could increase to infinity and the only real benefit would be that of the paper portfolios—as profits skyrocket.

The type market continues to show marked improvement as plus signs literally cover several sections of the type charts. The most active seem to be proof and MS-65 and 66 issues as marketmakers try to locate this material before it goes out of sight. The 63 and 64 material are also getting much more play as dealers feel some of these issues are downright cheap. Some of the MS-66 issues have increased as much as 30% in one week. Even a few of the MS-65's are up 20%. This indicates that dealers are making a very concerted effort toward buying these particular coins.

The U.S. gold market remains very tentative in MS-63 and lower grades. There seems to be a lot of material available and bids will fluctuate quickly, if only slightly. These changes will presumably reflect supply and demand of those individual bidders.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $24 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $7.50 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 100 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters and prooflike on dollars. PCGS has established grading sets for most major series

Certified Coin Dealer Newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bid at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate. Previous years certificates will bring substantially less than bids. NB - Represents no bid at this time

MINT STATE TYPE COINS

Prices are for the most common dates.
If the coin you have will stand on its own merits without the grading certificate and the CCDn bid is lower than the CDN, then refer to the CDN.

CREDIBILITY

A GOAL THAT'S NOW A REALITY

As numismatics grew from a hobby to a business to a major industry, it became evident that its growth was limited because of a lack of investor confidence—a real credibility gap. Simply put, the investment community and the investing public has not felt confident in the consistency of the industry's grading. They therefore could not view investing in coins as a sound investment option.

Those days are now over.
The NUMISMATIC GUARANTY CORPORATION OF AMERICA (NGC) has been formed to provide the industry with an independent, credible and superior coin grading service. Now dealers, collectors and investors can be confident that they will get consistent coin gradings, time after time.

And NGC plans on doing a great deal more. In the coming months we will be announcing a series of new plans and programs designed to foster the industry's pride, and promote professionalism and growth. NGC is committed to insuring that never again will our industry have a crisis in credibility—Now that's truly incredible.

A CLEAR VISION FOR A BETTER TOMORROW

CERTIFIED COIN DEALER newsletter

Vol. II No. 38 September 18, 1987 Single copy price $3.50

Common Date Dollars Continue Free-Fall, Quantities Abound

Recently, there has been a dramatic shift away from common date dollars in MS-65 and lower grades (*this may also be the case for common coins in other series*). As such, you will find another long list of minus signs on page three. One of the reasons for this downturn is the fact that more and more coins are being certified on a daily basis, then reaching the mainstream of dealer trading. This means that many of these issues become less rare as quantity figures increase. As the quantities available increase, dealers are lowering their bids so as not to be the high bidder. As stated many times, when this occurs, the most common dates (*which are the weakest*) will have a tendency to pull down even some of the better dates (*the ones which are only encountered on an occasional basis, but cannot be considered rare dates*) even though everyone knows they will still command higher levels.

This is what is occurring at this moment. Dealers have lowered their bids across the board for MS-64 and 65 dollars, including prooflikes, and some of the better dates have gotten caught up in this bearish market. With the lowering of bids comes an expected weakness, yet, sellers are not anxiously discounting all the issues for which there are minus signs. The issues which appear to be the weakest and are also somewhat available at or near current levels are 1879-S, 80-S, 81-S, 82-S, 83-O, 84-O, 85-O, 86, 87, 1902-O, 04-O, 21 (*Morgan*), 22, 23, 24, and 25.

This shift toward rare coins is showing up in higher bids for proof and mint state 66 and better quality and for specific dates of low mintage. A look through the 66 columns of commems (*both gold and silver*), dollars, and type shows an increase in bids for specific issues. Many dealers have sold their customers on the idea of rare dates, now they have to go out and locate them – this is proving to be a very difficult task.

The commem chart indicates many changes consistent with the common versus better date theory. Most of the Arkansas issues are higher in MS-64 and better, chiefly because they are difficult to find in these grades. They are characteristically weak struck. The majority of issues with minus signs are ones that are usually found in any number of dealer inventories.

Mint state gold, in MS-61 to MS-64, seems to be backing off a little as this is an area where dealers can increase their cash positions quickly without discounting coins too heavily. Some of the common date Saints are also falling back a little as supplies become more available.

Mercury dimes are showing a considerable lack of activity for full band specimens in MS-64 and 65. As such, bids are lower for many dates from 1916 - 39. Most of the decreases are in the area of 10%. MS-64, flat bands, have dropped to $20 bid for almost all dates from 1934 - 45 (*PCGS*).

Walkers are reacting a little bit like dollars. As more specimens become available, dealers are reluctant to maintain their high bids. In several instances, 1939 - 47, issues are lower for MS-64 to MS-66 coins.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $24 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $7.50 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown) full bands on Mercury dimes, full head on Standing Liberty quarters and prooflike on dollars. PCGS has established grading sets for most major series

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

Vol. II No. 39 September 25, 1987 Single copy price $3.50

Commems and Walkers Follow Common Dollars Down

The downward movement of common date Morgan dollars, in MS-64 and 65, continues unabated. Buyers are backing down their bids faster than they can be monitored. There seems to be an awful lot of merchandise on the market which is just sitting in inventory. This week's Long Beach Convention may not help the situation as dealers try to sell off some of this slow moving material, or, this situation could reverse itself dramatically.

The common Peace dollars, in MS-64 and 65, continue to free-fall, however, most of the other issues in MS-63 and better are in demand at current levels, some even higher. There are numerous plus signs in the MS-66 column as dealers realize there is not an overabundance of this quality of coin. As of the July 1, 1987, PCGS Population Report, there are only 47 Peace dollars graded MS-66 or better. And 32 of those are 1922-P, 23-P, 24-P, and 25-P. That doesn't leave many others.

The weakness in common Morgan dollars is not helping the silver commemorative market (*in MS-63 to 66*) and many walkers (*1934 to 45, in MS-62 to 64*) are also falling to lower levels. Many dealers are getting the feeling that some of these issues are oversold and future sales are not very predictable. As dealers see more and more coins coming on the market, having been sent through the grading system, some issues appear more frequently than others, thus, causing dealers to lower their buy prices for those issues. Moreover, being concerned that quantities of other issues will appear, they lower their buys on some of the rarer dates. This will cause bids to fall for certified coins, although, this may not effect the Greysheet since no one is actually selling these better issues at discounted levels.

Proof gold remains fairly active at current levels, however, some buyers will pay even more if they can view the coins before they have to commit to a bid. For example, we have $4 Stellas listed at $29,000, $40,000, and $57,500 in PR-63, 64, 65, respectively (*PCGS*). One dealer's sight seen bid is $34,000, $42,000, and $60,000, respectively. The approach this dealer takes, should prove very beneficial to his clients.

When it comes to the Washington quarter series, it appears that most buyers are only interested in MS-65 or better. As a result, lower grades seem to fall as there is very little support. When bidders realize how far off the spreads are between MS-65 and MS-64, then the newly attuned buyers will support the MS-64 market. For right now, buyers demand 65 and better.

Buffalo nickels appear to be solid at current levels in MS-65 and better. MS-63 and 64 coins have a few downward adjustments, but are still fairly active. Most of the changes in the Mercury dimes column are to the upside. This area of the market is firm at today's levels.

Mint state gold has numerous adjustments in both directions. The primary movers are the common issues in MS-61 through MS-65. This market is very active.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $24 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $7.50 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers and many more who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown) full bands on Mercury dimes, full head on Standing Liberty quarters and prooflike on dollars. PCGS has established grading sets for most major series

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate. Previous years certificates will bring substantially less than bids. NB - Represents no bid at this time.

Lower Bids a Result of Heavy Inventories and Bargain - Hunting

Bargain - hunting seems to be the tactic that most dealers are using according to our latest reports. The majority of marketmakers have lowered their bids, almost across the board. Almost every series contains a slew of minus signs. This weakness was readily apparent at the just completed Long Beach Convention, as lower bids made it difficult for buyers and sellers to get together. It appears that consummating deals may be somewhat stalled as sellers want 10% - 15% more than buyers are willing to pay. It is difficult to tell how weak this market is until buyers and sellers get together. Either buyers will have to raise their bids, or sellers will have to lower their sell levels. If the latter occurs then this market will probably go lower. One hint as to the general direction of the market could be studied at Long Beach. *There was an awful lot of inventory of certified coins in most showcases. True, it was mostly common coins, but, the large quantities of common coins, when readily available, will tend to drag the rest of the market to lower levels.*

As part of their sale last week, Superior Galleries conducted a PCGS Auction. The following coins were a few of the highlights of this sale.

Denomination	Grade	Price Realized
1859 Three-Cent Silver	MS-65	$1,760
1924-D Buffalo Nickel	MS-64	$1,100
1857 Seated Half Dime	MS-65	$2,750
1859-O Seated Dime	MS-67	$9,350
1876 Twenty Cent Piece	MS-66	$9,350
1806 Draped Bust Quarter	MS-63	$8,690
1899-S Barber Quarter	MS-67	$7,700
1881 Seated Half	MS-66	$9,900
1897 Barber Half	PR-66	$7,480
1866 Seated Dollar	PR-65	$9,680
1879 Morgan Dollar	PR-67	$15,950
1855 $1 Gold	MS-65	$25,300
1879 $4 Gold Flowing Hair	PR-64	$43,725

As one can see, rare coins have no problem finding new homes at, or above current bid levels. The majority of lower levels are being caused by the generic coins – the ones that get graded on a daily basis and then end up as stale inventory in dealer boxes.

Common date Morgans have now fallen to $135 in MS-64 and $290 in MS-65. These are sight unseen bids and obviously, buyers are not all that interested in stocking any more common dates. We have seen numerous coins command higher levels on a sight seen basis. Since bid levels have dropped so dramatically, some astute buyers are trying to take advantage of these low levels and purchase the better dates at, or near the same levels. Common Peace dollars in MS-64 and 65 seem to have come out of the woodwork. There appears to be so many available that buyers have dropped their bids to seemingly ridiculous levels. Or so they seem ridiculous until you see sellers actually having a difficult time trying to move this merchandise at just above these bids.

As with the dollar market, dealers are also lowering their bids for common type coins. This gives the appearance of a weak market, yet, one can see how specific dates will bring very good prices at auction. This is another case of common issues misleading a market trend.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $24 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $7.50 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

SELECTED MS 63 DOLLARS

Our "Raw" Select Quality will parallel PCGS and may even exceed a given grade in some instances.

All coins will be original, undipped, choice and fully struck.

Due to obvious space limitations I could not print ms 60, 64 and 65 prices but if you desire a quotation on xf/au, au-55, au-58, etc. please do not hesitate to call.

We are interested in dollar sets and collections so when you decide to sell, call us.

YOUR SATISFACTION IS GUARANTEED.

If you see advertised prices for less, you may be getting a "flying saucer grade"..... (Hi, Kara!)

Remember, I travel to approximately 50 coin shows every year and visually examine literally millions of silver dollars annually.

We can deliver the best quality for less, and we will cater to the picky collector. Let me know what you are looking for or send a sample order.

Still Lower Bids Haunting Common Date Certified Market

The most positive aspect of this week's market must be analyzed by reading "between the lines", so to speak. If one looked only at the number of minus signs versus plus signs, one would feel the whole market is in a down cycle. Granted, the number of issues lower this week may be staggering, yet, the majority of these adjustments are for the more commonly encountered issues. That is, the coins that are graded more often by the grading services and wind up in dealer inventories as an overabundance of material. Many of these issues sat at grading services for a long period of time, waiting to be processed through the system, thus, while the market weakened slightly, new, larger supplies appearing on the market have driven bids even lower.

Furthermore, progress sometimes brings interim results which are not properly analyzed at the outset. The PCGS Population Report, which lists the number of specific coins graded within each grade, may indicate a high number of coins graded within a particular area. This may and has caused many buyers to lower their bids for that particular issue. Yet, what constitutes an overabundance of coins in one category? At this point in time, over 7,000 MS-64 1881-S dollars can throw fear into the high buyer. However, if financial planners and stock brokers begin to sell coins on a national basis, this will be but a drop in the bucket. In the meantime, bids are also falling for other issues where coins graded figures are substantially less. The problem here is very basic – dealers have large inventories of these so-called common issues and they keep going around the wholesale circuit. Dealers have already sold their steady clients these common dates and they don't want anymore. So the excess is dragging the whole market down and this may not change until this excess finds new buyers to get them off the market.

The positive nature of the market might best be viewed, not only by the number of plus signs, but also by looking over the issues where bids have remained status quo. The majority of these issues have steady buyers at these levels, or, sometimes higher depending on how rare they are. One will find that the issues with plus signs or the ones that haven't changed are usually the ones that have been graded in the smallest quantities by the grading services. As a number of dealers pointed out at the beginning of this year, "it's about time for dealers and their clients to start buying *rare* coins". Maybe this is the shakeout that will make this prediction a realization.

Early Buffalo nickels and Walking Liberty halves are getting a lot of attention in MS-65 and higher grades. At the very least, there are buyers at current levels for most issues, while some buyers are willing to pay more and have advanced their bids. Even though some of the later Walkers (1941-47) have numerous minus signs, most issues are very active, especially the MS-66 and 67 coins.

If one conclusion can be drawn from viewing the dollar charts, it is that dealers are staying away from MS-63 and lower quality and they are trying to buy MS-64 and better. Even the most common dates in 64 and 65, although some show minus signs, seem to have stabilized somewhat as the high bidders increased their bids from even lower levels.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $24 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $7.50 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series

MINT STATE TYPE COINS

Prices are for the most common dates.
If the coin you have will stand on its own merits without the grading certificate, and the CCDn bid is lower than the CDN, then refer to the CDN.

NUMISMATIC
GUARANTY
CORPORATION
OF AMERICA

THE PROMISE IS NOW A REALITY!

THE GRADING SERVICE THAT DELIVERS

Recently, when Numismatic Guaranty Corporation opened its doors, a large number of the country's leading coin dealers had already become members of the Numismatic Guaranty Corporation network. That's because they've recognized the need for improvement in coin grading. They know that Numismatic Guaranty Corporation is committed to providing the most accurate and consistent grading services available today. And because Numismatic Guaranty Corporation will not buy, sell or trade coins, you, the investment community and the investing public can have confidence in this credible coin grading service.

For more information, contact
NUMISMATIC GUARANTY CORPORATION
P.O. Box 1776, Parsippany, New Jersey 07054

THE COIN GRADING SERVICE ENGINEERED TO PROVIDE UNBIASED GRADING.

CERTIFIED COIN DEALER

Vol. II No. 42 October 16, 1987 Single copy price $3.50

Common Date Morgan Dollars Advance in MS-64 and 65

Bargain-hunters are not having much success in the area of MS-64 and 65 Morgan dollars. They may find an occasional coin or two, but, for the most part, sellers are refusing to let go of this material at anything less than current bids. Furthermore, most wholesale trades are taking place at higher levels as buyers who need this material must meet the sellers' demands or run the risk of not immediately filling their orders. Again, those dealers who have plenty of time on their side, can buy one or two coins at a time at more reasonable levels. Then again, most of the discounted coins are on the low-end of the grading scale. As usual, most dealers are likely to pay more for coins they can view before they commit, as long as these coins meet their personal grading standards. Keep in mind, the marketmakers who bid for coins sight unseen, usually sell to other dealers sight unseen. Very few of their clients will buy coins without seeing them first.

Minimum bid for Morgan dollars is now up to $140 for MS-64's and $300 for MS-65's. It appears that we have seen the bottom of this market and most issues are stable to higher. Prooflike dollars have suffered of late (MS-63 to MS-65), however, this week finds bids advancing to a minimum of $500 in MS-65 P/L. There is not enough attention paid to this area of dollars at this time, although the future should prove differently.

Peace dollars are showing some weakness in MS-65 and lower grades. The most common issues are offered on a regular basis at discount prices. Even a few better issues have fallen as marketmakers have lowered their bids for some issues. The MS-66 and better market remains quite strong at current levels.

Silver commems seem to have steadied considerably since last week's mass of minus signs. The majority of issues have active bidders at today's levels. The few minus signs are a result of lower sell levels for the specific issues involved.

Although gold commems have suffered a few losses, most issues have consistent demand at today's levels. Availability seems to have increased slightly for the issues indicating minus signs.

Flat band Mercury dimes (1916 to 1930) remain active in MS-64 and 65. However, later issues in MS-65 are retreating a little as quantities become more plentiful. The Full Band market, which has stumbled along for the last few months, continues to reveal weakness in MS-65 (1924 to 42). Even MS-66 FB specimens have fallen to $225 minimum bid for common dates.

The U.S. gold market is relatively stable in MS-65 and better, yet, many common issues have fallen somewhat in the MS-64 and lesser grades. Activity has slacked off a little, but many dealers feel much of this material is a good buy at current levels.

Walkers have firmed up this week as marketmakers held their bid levels in all grades. Minimum MS-64 bid is now $140, while MS-65 bid is $300. An interesting side note: These are the same minimum bids as Morgan dollars.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $24 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $7.50 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

CERTIFIED COIN DEALER newsletter

Vol. II No. 43 October 23, 1987 Single copy price $3.50

Rare Coin Market Stronger Than it Appears

As we monitor and evaluate pricing information on a daily basis, we have become increasingly aware, and we have tried to relay this awareness to you dealers, that the coin market is only as strong as its high buyers. One must recognize that the higher buyers will tend to lower their bids as they increase their inventory. The more common coins will be bought easier than the rare coins. Thus, common coins will give the appearance of a free-fall if the high buyers withdraw or lower their support. Since the majority of coins listed in the *CCDn* are graded MS-64 and lower, then the majority of these coins are the ones most commonly seen and inventoried by dealers (*almost all dealers have plenty of inventory*), these are the very same coins which tend to give the market an appearance of weakness. These coins float around the dealer circuit until they reach an appropriate level. Eventually, they reach a level where dealers feel it is going to be profitable to hold them.

The rarer coins should be the real test of the strength of the market. Even though some bids are lower in the *CCDn* than their corresponding bids in the *CDN*, you don't see these coins trading at the low bids. For example, 1903-S and 04-S dollars are bid fairly low in the *CCDn* compared to their real value. Real value meaning what they would probably trade for if they were around and available. However, since most dealers have plenty of inventory, they bid higher for coins on want lists than they would for coins which they already own. This is very basic, yet, it seems like some people don't understand this law of supply and demand. This issue does become a little clouded when one sees bids fall for rare coins that are not really available. This may occur when the high buyers lower their bids, very simply, in order to protect their cash positions.

These last several weeks have seen an increase in the amount of business being done by those dealers who buy and sell NCI coins. Since NCI coins trade for considerably less than ANACS or PCGS coins, the recent downturn of bid levels has not affected NCI bids nearly as much. This may give NCI coins an appearance of strength at current levels, thus, explaining their recent increase in popularity.

A new grading service has appeared on the scene in an attempt to compete with the three, already entrenched, major grading services. It is Numismatic Guaranty Corporation of America, based in New Jersey. It began operation in August, and now purportedly has nearly 100 charter members. We have monitored some sporadic bidding, sight unseen, and early indications seem to show their comparability with ANACS and PCGS prices, or even slightly higher. Although, time will be the true test and whether dealers accept their grading standards.

This week finds the overall market fairly stable at current levels as the majority of marketmakers keep their bids steady. There are a few minus signs, here and there, mostly for more common issues by grade. The real encouragement comes in light of numerous higher bids throughout the various series in all grades. The plus signs are mostly indicative of the harder to locate issues.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $24 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $7.50 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

NUMISMATIC CERTIFICATION INSTITUTE

Save As Much As 50% With NCI's New Dealer Discounts.

Now you can get NCI's expert grading for EVEN LESS! You'll pay only $10 each for NCI certificates on any coin with an owner stated value of $250 or less, with a minimum of 100 coins. And the savings to you are incredible.

Save ½ On Certification!

If you sent us 100 coins valued at $250 each, NCI certification would normally cost around $2,000. But with NCI's Volume Dealer Discounts, you'll only pay $1,000 – a savings of $1,000!

Still The Fastest.

Due to the enormous volumes that will be handled, we can't guarantee our usual 10-day turnaround for dealers using our Volume Discounts – but the average turnaround will be only 15 days, still faster than any other certification service.

The Same Expert Grading.

What's more, your coins will get the same expert grading that NCI is famous for, described in detail by grading authority Jim Halperin in his book *The N.C.I. Grading Guide.* That means "real world" grading that uses the standards of the daily marketplace to determine a coin's value.

Strike. Wear. Bagmarks. Luster. Eye appeal. Every possible factor is carefully considered in a proven process that's tough but fair.

Call Now!

NCI's Volume Dealer Discounts offer you more. Expert grading. the fastest turnaround. And all at savings up to 50%! Call Amy Dew NOW at **800-527-9250** so that you can start taking advantage of NCI's Volume Dealer Discounts today. And pay less for the fastest expert grading on the market.

nci *Numismatic Certification Institute*

Expert Grading in Record Time.

Conservative Bidding Dampens Strength of Sight Unseen Market

With the stock market considerably weaker than it was a few weeks ago, one might anticipate a fairly strong coin market in the near future. As of this writing, the public must feel that the government will intervene in order to boost the stock market, the "dollar", and the economy, in general. This concern over possible government intervention spills over into the coin market as dealers, even though they may feel that the coin market is about to explode, continue to post conservative bids for the majority of issues listed in the *CCDn*. This can be quite deceiving as it is our posture to list the highest bids monitored on a consistent basis. Yet, if the highest buyers lower their buys, it may result in lower bids, thus, giving the market an appearance of weakness, when in fact, a majority of issues cannot be purchased for any less than when bids were higher. For the most part, bids are not representative of what price levels dealers will sell at, bids are indicators of what a specific dealer will pay for an issue sight unseen. He may be willing to pay more for limited quantities depending on need.

Obviously, if bids are considered to be base prices for specific issues, then dealer sell prices must be considerably over bid in order for the company to remain in business. Success breeds success, and most consumers would rather deal with a firm that looks successful than one that appears to be going out of business, especially when dealing with their hard earned discretionary income.

Despite a few sporadic minus signs, the Morgan dollar market appears quite solid and contains numerous plus signs. Minimum bid for MS-64 dollars has increased to $145, while 65's remain status quo at $300. There have been a few limited-quantity buys for MS-65's at the $310–$315 level and the bidders were willing to accept 1881-S's at this level.

The Peace dollar series is getting hit awfully hard, especially for MS-64 and MS-65 issues. The number of minus signs is quite extensive throughout the MS-64 column and about half of the MS-65's. The major marketmakers have reduced their buy prices as much as 50% from the highs of a few short weeks ago. Through monitoring of prices, we have not seen any enormous amounts of coins for sale at reduced levels.

Bid levels for many silver and gold commems have dropped this past week and it's very difficult to understand why marketmakers have reduced their bids, especially for gold commems. Some bids have fallen 20%, yet, in MS-65 and better very few coins are available. The only thing that makes any sense at all, is that most of these bids went way up and now this is just a correction. One wouldn't think that gold commems could be weak considering their lack of availability.

The Walker market is slightly mixed according to supply and demand of the individual dealers' needs. Generally, this series is steady in MS-65 and better, while a few sporadic minuses do appear for MS-62 and 63 issues.

The U.S. gold market in certified coins continues to fluctuate according to needs of the marketmakers. This past week has seen Saints on the rise: MS-63/$880, MS-64/$1,400, and MS-65/$2,800.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $24 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $7.50 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate. Previous years certificates will bring substantially less than bids. NB · Represents no bid at this time.

Sellers More Indicative of Market Strength

It can be relatively simple to measure the strength of the certified coin market by counting the plus signs in all of the columns. However, if one tries to evaluate the weakness of the certified market by tallying all of the minus signs, one can get a very distorted picture. In the event you are in this second category, you probably feel that the market is currently quite weak and you are avoiding the purchase of any added inventory. On the other hand, if you feel that you want to take advantage of low bid levels and are trying to buy coins at these levels, you will probably gain a little more insight into the marketplace and realize the certified market is anything but weak.

Over 90% of the coins listed within these charts cannot be purchased at these levels, on a regular basis, by one dealer from another. (One must remember that these bids represent what dealers are willing to pay strictly on a cash basis without seeing the coin. These bids must be conservative in order to protect the dealer.) In fact, when monitoring bids, we may typically find a dealer trying to buy one or two specific coins at 10% – 15% over bids, however, no other dealer is willing to part with these coins at these levels. Yet, since the bid was limited in quantity the *CCDn* bid will not increase because this buyer is not actually making a market in these coins.

When a marketmaker puts his bids on the line, he must be willing to stand behind his bids, thus, he keeps them relatively conservative, especially on coins where there may be a large population. The actual marketmakers make up only about 2% of the dealers across the country. The other 98% of the dealers may try to buy at these levels, but, except in limited cases, they are paying well over these bids. In fact, when the marketmakers need the individual coins they are bidding on, they usually have to pay over their bids, sometimes substantially.

Although the majority of bid changes are to the downside, the overall market is quite stable. As reflected in the *Greysheet,* there are very few properly graded coins being offered at discounted levels. Dealers are just not ready to lower their sell prices when they feel there is no better place to put their money.

Peace dollars are going through the same experience Morgans did last year when prices were so high that they were bound to turn around and correct. The situation then over-corrects as the marketmakers scramble not to be the high bidder. So bids fall dramatically, however, there are not any great quantities available at or near the new lower levels. MS-66's are still holding up rather well, mainly due to the fact that not many have been graded.

Silver commems appear to be weakening, but this occurrence is due to one major marketmaker dropping his bids as much as 35%. However, except in very limited quantities, one cannot locate very many of these fallen issues at discounted levels.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $24 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $7.50 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986 to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin plus postage and insurance, no matter how valuable the coin is When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers and many more who deal in PCGS coins, will make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red brown) full bands on Mercury dimes, full head on Standing Liberty quarters and prooflike on dollars. PCGS has established grading sets for most major series

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

NUMISMATIC CERTIFICATION INSTITUTE

The [illegible] reverse

Certificate No. [illegible] Date [illegible]

[illegible]

Owner's Stated Value: [illegible]

Certified Grade: [illegible]

Save As Much As 50% With NCI's New Dealer Discounts.

Now you can get NCI's expert grading for EVEN LESS! You'll pay only $12.50 each for NCI certificates on any coin with an owner stated value of $250 or less, with a minimum of 100 coins. And the savings to you are incredible.

Save ½ On Certification!

If you sent us 100 coins valued at $250 each, NCI certification would normally cost around $2,400. But with NCI's Volume Dealer Discounts, you'll only pay $1,250 – a savings of $1,150.

Still The Fastest.

Due to the enormous volumes that will be handled, we can't guarantee our usual 10-day turnaround for dealers using our Volume Discounts – but the average turnaround will be only 15 days, still faster than any other certification service.

The Same Expert Grading.

What's more, your coins will get the same expert grading that NCI is famous for, described in detail by grading authority Jim Halperin in his book *The N.C.I. Grading Guide.* That means "real world" grading that uses the standards of the daily marketplace to determine a coin's value.

Strike. Wear. Bagmarks. Luster, Eye appeal. Every possible factor is carefully considered in a proven process that's tough but fair.

Call Now!

NCI's Volume Dealer Discounts offer you more. Expert grading. The fastest turnaround. And all at savings up to 50%! Call Melissa Clifford NOW at **1-800-9-NCI-NCI (962-4624)** so that you can start taking advantage of NCI's Volume Dealer Discounts today. And pay less for the fastest expert grading on the market.

Better Date Morgan Dollars Climbing in MS-65

The Morgan dollar chart is beginning to show signs of stability. Bidding for common dates is generally more positive as several dealers are now running spreads for MS-64 and MS-65 specimens. Minimum bid for MS-64 is $140 with sell prices monitored at $145. However, the sells are limited by the number of coins on hand. So if someone tried to purchase 100-200 coins, I am sure they would run anywhere from $145 to $160, and these would mostly be the low-end coins. Common date MS-65 coins are now bid at $305 for the least expensive issue, with sellers offering "lots" at $345. Again, many of these may be sight unseen low-end coins, as some buyers are willing to pay $375 for common issues on a sight basis. The MS-65's are also limited by the number of coins on hand.

Better date dollars seem to be moving in an upward direction with a number of various buyers creating an active, consistent market. In the cases of these rarely encountered MS-65 dollars, bid prices of these dealers may even be conservative when put in a proper perspective. Many of these issues have between 4 and 10 coins graded MS-65, and sellers are reluctant to part with them. Recently, an 1888-S, which is now bid at a higher $2,900 in MS-65, brought well over the $3,000 figure. This was about 30% over the then current bid. Yet, if this high bidder had raised his buy price to say, $3,200, then a knowledgeable seller would still want in the neighborhood of 30% over bid. This, of course, is the difference in better dated coins, in any series, which may have a very low availability rate versus the most common dates, which may be found in almost any dealer's inventory. Those dealers with the most knowledge will trade the rarer coins, buying and selling, at over bid levels. Besides the 88-S, some of the other issues on want lists at higher levels are 1879-CC, 79-O, 81-O, 82-O, 87-O, 91, 91-CC, 92, and 93.

The silver commem market finds several issues lower in MS-63 and 64, due to discounted sells. On the other hand, the lower bids in MS-65 are a result of marketmakers lowering their buys. In the MS-66 column, numerous plus signs can be found as a couple of marketmakers try to stock up on this prestigious grade. Gold commems are fairly stable at current levels and, generally, are not offered at discounts from bids.

Buffalo nickels are steady in all grades (very few minuses) except where pluses can be seen and these issues might be considered hot. The MS-66 column is covered with plus signs (1914-28) as most of these dates cannot be purchased in this elusive grade. Generally, the 'D' and 'S' mintmarked coins come weakly struck and will not grade higher than MS-64, at best.

Walking Liberty halves (1940-47) have a very solid market with a few issues operating under a very thin buy/sell spread due to the ease of availability. At the same time, several issues, MS-64 & 65, have adjusted lower because of this availability. However, most adjustments are minor. In the MS-66 and 67 columns, changes are mixed, while trading is active.

The type market is steady to higher in all grades. This area seems to be finding more buyers at, or near, current levels. Some of the bids for Seated material appear awfully low when compared to asking prices. **When trying to buy various coins, some dealers use the sight unseen bids of the *CCDn*, yet, when they offer to sell the very same coins, they try to get near the "ask" price of the *CDN*.**

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $24 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $7.50 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A nonprofit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986 to grade and authenticate U.S. coins only. Located in Newport Beach CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers and many more who deal in PCGS coins, may make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red brown) full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

GOLD COMMEMORATIVES

ANACS coins do not trade nearly as often as PCGS coins. ANACS bids are based on strict market standards and trade at these levels only on a sight basis.

THE SIGN OF A NEW ERA IN COIN GRADING

The Numismatic Guarantee Corporation was founded to ensure unbiased, arms-length coin grading. The principals of NGC can not buy, sell, or trade coins commercially. NGC is creating *the* standard for objective, consistent, and accurate grading of higher quality, investment grade coins.

Look for premium quality, NGC certified coins at the following Member/Dealers.

CERTIFIED COIN DEALER newsletter

Vol. II No. 47 November 20, 1987 Single copy price $3.50

Overall Market More Stable Than It May Appear

The overall picture of the rare coin market seems to be one of stability. This view is summed up by the monitoring of actual sales and offers to sell. Very little merchandise is offered for sale at anywhere close to the bid levels. Generally, the only coins that may be offered near, or at, current levels are the issues which are the most common for the grade (MS-64 & 65 Walkers – 1941-45 'P' mints, MS-64 & 65 Morgans – 1880-S, 81-S, 86-P, and occasionally a few others), and when they are offered at these levels, if there are no active buyers at current levels, then bids fall. Furthermore, bids may fall if the high buyers lower their buy prices to below bid levels. So, it is a very few number of issues within each particular series that may be lower, yet, the rest of the issues within these series are actively sought, but rarely found. As long as dealers do not threaten the current market with "fire sales", this stability should continue.

However, there is a certain perceived weakness that must be taken into consideration when analyzing the rare coin market. That is, sight unseen bidding by PCGS marketmakers is becoming very thin. So thin, in fact, that numerous MS-66 Morgan dollar bids are down sharply, or, as a matter of fact, replaced by NB, which stands for "no bid". Why, on earth, would anyone run MS-66 bids way up and then let them fall way back? Especially when no coins have been graded by PCGS. For example, in the July 31st, *CCDn*, an MS-66 1893-CC dollar was bid at $9,500. Recently, it was bid at $12,000. However, now, there are no visible bidders, at any price. What happened, did PCGS grade a bunch of them? No, as of the October 21st Population Report, there are still none graded in 66 and only one graded in 65.

There are other examples of rare dates falling drastically as marketmakers lower their bids. Then, can these sight unseen low-ball bids be representative of the true value of these rare dates. I hardly think so, for many of these same marketmakers will pay *Greysheet* bids for coins they can view and which meet their personal grading criteria. It is indeed, the sight unseen bidding of a small number of PCGS marketmakers which gives one phase of the rare coin market a perceived weakness.

Minimum bid for common date Morgans remains at $140 for MS-64's and has increased to $310 for MS-65's. Peace dollars are fairly steady at today's levels with very few being offered for sale above the grade of MS-63.

In contrast to our earlier example of rare date MS-66 dollars, proof singles in the Mercury dime and Walking Liberty half series are experiencing lower bids for various dates due to more coins having been graded and the ease of availability. As a result, this week finds several minus signs in the PR-64 thru 66 columns of "Proof Singles".

The commem market is fairly mixed this week with pluses and minuses. Most of the downward movement is due to discounted sales with the major exception of the Arkansas issues. These had moved up to such high levels, the result of one main buyer, that when he lowered his bids the secondary buyers were still way below our bid levels. This same scenario has occurred for some of the gold issues in high grades. Although most trade at over bid levels, the sight unseen bids have fallen off considerably.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $24 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $7.50 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers and many more who deal in PCGS coins, may make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red brown) full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

Dollars, Commems Stable, Proof Gold Drifts Lower

The certified coin market is taking a backseat to holiday gift buying for the time being. This may be part of the reason for lacklustre bidding activity of late as most want lists consist of gift type items. Nonetheless, it seems that as every day goes by, certain coins become less rare, thus, buyers lower their bids creating minus signs. This is primarily occurring for modern coinage (Walkers, Mercs, Washingtons) in 64 thru 66 grades, but, may also occur for some earlier issues as well. Part of this problem has been created from the acceptance of grading services by dealers and their clients.

From the first day a grading service begins certifying coins, all coins in their particular holders are rare. As the service grades more coins, eventually, the most common coins will have the highest numbers in a census report. For example, the first 1880-S dollar in MS-64, graded by a new service may be worth $300. The second one makes the first one less rare and so on down the line until maybe 2,000 coins are graded and the value falls in line at $140 - $150. In time, as more coins are certified in a specific grade, the desire becomes stronger for a higher grade where the coin is less frequently encountered. There is a tendency for dealers to bid higher proportionately for coins which have a minute population where they may only buy one, thus owning a rarity, versus a lower grade where they may bid too high and end up with an excess in inventory.

This is in direct contrast to what numismatists have learned over the years, wherein, as time goes by, coins will generally become rarer. This occurs due to natural attrition, mishandling, government or non-government meltings, or, for that matter, collectors and investors taking them off the market. Prior to grading services monitoring the population of specific issues, nobody really knew exactly how many of most coins, in an exact grade, might be available. Now, we can venture a minimum guess and be real close. Ten to twenty years from now, this information will be more exacting and will be used to evaluate coins due to their rarity, not just availability and original mintages.

As stated earlier, bidding activity has slowed due to the approaching holiday season. However, the Morgan dollar market has remained fairly stable at current levels. There are some adjustments to the downside in MS-64 thru MS-66, as dealers offer specific issues at lower levels. The Peace dollars are generally steady in all grades with a very few minor exceptions.

Proof gold has taken a sharp turnaround. The majority of issues are down as a result of lower bidding by the active marketmakers. This does not necessarily mean that quantities are available, or, for that matter, that you can find very many at, or near, current bids.

The commem market is mixed with a fairly well balanced number of pluses and minuses. This series is still very active at current levels with many dealers willing to pay higher for sight coins. If specific issues are offered at discounts, and they are accurately graded, they will usually sell quickly.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $24 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $7.50 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, may make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown) full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

High-Grade Commems, Dollars, and Type—Active

The overall coin market appears to be stable to moderately higher. This past week has seen an increase in bidding activity on the various teletype systems. Dealers buy lists are also playing an important role at this time. It does appear that there may be a slight shift to the right hand columns on the charts as many buyers are looking for higher grade material which shows up less often than lesser grades. For the most part, minus signs are a result of lower bidding levels, not discounted sells, whereas, plus signs indicate dealers are willing to pay more than bid for various issues. The following is a series by series analysis.

The commem market is relatively stable at current levels with a number of adjustments in both directions. Several gold issues are falling due to lower bids, which in most cases, are a result of dramatically advancing bids over the last several months. After a series of long steady increases there are bound to be some corrections. Many of the silver commems which fell this week (MS-63 thru 65), were a direct result of discounted sales. However, quantities offered are usually limited in number. Further justifying these changes, is the fact that the high buyers may have lowered their bids.

The dollar charts are covered with plus signs, although minuses are readily visible also. It appears that a division line is being drawn between grades with most coins grading MS-64 and higher in more demand than lesser grades. Furthermore, the farther one moves to the right, the stronger the demand—and less likely the bidder is of actually purchasing the specific coin due to a thinner availability. It is easy to understand why clients of dealers want higher quality since that's what dealers are looking for also. The clients are educated as to what the dealers demand so that they do the same. MS-66 Peace dollars continue to be difficult to purchase even at higher bid levels. In contrast, the majority of issues in MS-65 and lower seem to be easier to locate, thus causing buyers to lower their bids, in some cases, drastically.

Type coins are holding fairly stable at current levels, although, some dealers bid even higher, but, they make the stipulation that the coins must satisfy their personal grading standards, i.e., "sight seen." As in other series, type coins in 66 and better are receiving a lot of attention.

Proof gold seems to be faltering as the number of active bidders is decreasing. Moreover, each week brings even lower bids. Granted, prices ran exceedingly high rather quickly, but with the small number of proof gold coins minted, let alone the minute availability, it doesn't seem like they should fall at this quick a rate. Yet, they appear to be doing just that.

U.S. gold in mint state has a mixture of pluses and minuses. However, unlike the other series, MS-65 and better, are generally lower. This must be due to the fact that most of the marketmakers simply feel that they were bidding too high and didn't have any place to go above those levels if they were to buy any. The MS-61 to 64 issues, which are the ones most actively traded, contain adjustments according to the needs of the individual bidders.

The high bidders for MS-66 Buffalo nickels have backed-off their buys somewhat, and, as a result, bid levels have fallen for a majority of the issues throughout this series. The Mercury dime series is suffering from the same dilemma in MS-66.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $24 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $7.50 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986 to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, may make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value

PCGS identifies color on copper (red brown) full bands on Mercury dimes, full head on Standing Liberty quarters and prooflike on dollars. PCGS has established grading sets for most major series

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

Announcing
Another Great Case For Using NCI.

When you send your coins to the Numismatic Certification Institute for fast professional grading, you now have a choice . . .

Now available – optional protective cases.
For only an additional $6.00 per coin, NCI will sonically seal your coins in snug tamper-proof cases. Your coins are protected, easy-to-handle and easy to view.

Confidence you can sell.
Even without the case, NCI is recognized by thousands of collectors and dealers as the favorite third-party, independent grading service.

Your coins receive "real-world" grading by widely respected experts such as James Halperin and Steve Ivy – grading based on the market you trade in every day. You receive a certificate featuring detailed and accurate full-color photos of both sides of the coin. And our authenticity opinions are insured for up to one million dollars in the aggregate.

Service in 10-12 days!
NCI gives you the fastest service in the industry: a remarkable 10-12 day turnaround. And if that's not fast enough, you can use our 48-hour Express Service. Either way, you'll have your coins back in days, not months.

Send in your coins today.
To give your coins the NCI edge, please call us toll-free. You'll have a better case for selling your coins.

CERTIFIED COIN DEALER newsletter

a weekly report on the certified market
published by the Coin Dealer Newsletter (est. 1963)

Vol. II No. 50 December 11, 1987 Single copy price $3.50

Coin Market Slowdown Not Unusual This Time of Year

The appearance of minus signs in the *Coin Dealer Newsletter* is usually an indication of a weakening market, or, at the very least, that specific coins are available at discounted levels. However, the same may not be the case for the *Certified Coin Dealer newsletter.* Minus signs may not be an indication of coins being available at lower levels. Bids for certified coins are strictly a function of dealer buying activities. If they raise their buy prices above current bid levels, bids will surely rise. But, if they lower their buys, whether bids fall of not will depend on what other dealers do. If all dealer buys are under bid, then quite naturally bids will fall. Furthermore, bids may fall if sells are lower than bids and the high bid buyers do not absorb the supply. Continuing, there is a further reason that could cause bids to fall. It is one of inactivity. If a specific issue, one which is fairly common to wholesale trading (for example, an 1881-P or 82-P, Morgan dollar in MS-64), rises to say, $400 bid, then does not see any active bidding at anywhere near this level or no bids at all, the bid will fall until it finds a level that attracts bidders.

The overall certified market is a very active institution, however, the number of active bidders on a sight unseen bid is so thin that it gives the outward appearance of weakness. In reality, there is a significant amount of coin business going on, but, there are a very few actual number of dealers who will guarantee to buy coins at a specific figure on a sight unseen basis. Nevertheless, there are thousands of dealers who will be glad to buy coins on a sight seen basis and many of these offer their own buy-back guarantee to their customers.

Although some of this week's many minus signs are a result of discounted sells, the major portion of lower bids are a result of dealers lowering their buy prices, while others choose to take time off from the coin business. Many dealers realize that this time of the year finds less interest in collector and investor coins. Many numismatists are gearing up their attitudes for the new year, beginning with the FUN Show.

The recent runup of proof Lincoln cents (Proof 65 and better), 1936–1942, has stalled this week as only the PR-67 1936 has a plus sign. This area seems to be following the same path as the other proof modern singles in high grade. They move higher and higher until there have been sufficient quantities run through the grading services, then the high buyers back-off their bids as supplies more than cover the demand, this scenario can be brought into proper perspective by looking at Franklin halves. At first, their value was so low that it was not worth-while to have them certified. As demand forced bids to higher levels, it became lucrative to have them graded. Nice looking raw coins could be sent to a grading service and might come back anywhere from PR-64 to PR-67. Anything graded 65 or better was a profitable experience for the owner. However, there have now been over 3,000 PR-65 Franklins graded by PCGS alone (1960 to 1963). Almost 1,000 (again 1960 to 1963) have been graded 66. The results are not unexpected as bids have fallen some 40% - 50%.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $24 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $7.50 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, may make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value

PCGS identifies color on copper (red brown) full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

CERTIFIED COIN DEALER newsletter

a weekly report on the certified market
published by the Coin Dealer Newsletter (est. 1963)

Vol. II No. 51 December 18, 1987 Single copy price $3.50

Bidding Activity is Generally Steady For This Last Issue of Year

As this year draws to a close, we would like to wish all of our readers a happy and safe holiday season. This is our last issue of the year; our next issue will be dated January 1, 1988. May you all have a very successful 1988.

Even though the certified market has slowed considerably the last couple of months, there are some positive signs to be found in this week's bid changes. Throughout the charts you will generally find a nominal amount of minus signs (with the exception of Walkers where there are an extraordinary number of minuses), mostly due to discounted sales, however, on the other side of the coin there are a goodly number of plus signs.

Plus signs are at least as prevalent as the minuses, which has to be viewed as a positive indication of next year's coin market. It appears that numerous dealers are in the market for a wide variety of items in various grades. This gives the market added strength as each dealer makes his own market in any number of issues. Not all dealers can buy all coins. And it now appears that many of them are realizing this as they make markets in 10 - 20 different issues at competitive levels.

There does appear to be a lessening of bidding activity for higher grade material, MS-66 and better. This is not because dealers are not interested in this material, because they are; it is because there are so few coins available in these high grades that they can't buy any anyway. And usually, if a seller is in the market to dispose of one of these rarities, he will typically use the bid price only as a base and then add some percentage to his asking price. So it is more beneficial for buyers to leave bids where they are, which will enable them to buy at more reasonable levels.

Sight unseen bidding tends to make the bidders a little conservative and at the same time may not reveal the true value of specific coins. It is true that with some issues, which have a large population to draw from, bid levels are a strong determinant of value. For example, an 1880-S dollar, in MS-64, is bid $140. That means there are buyers at this level yet, at $150, there are also sellers. It is easy to determine wholesale value – $140/$150. Nonetheless, what is the value of an 1895-O Morgan, in MS-64? As of October 21, the PCGS Population Report indicated only 3 were graded in MS-64. A few weeks ago, one sold sight unseen, from one dealer to another, for $9,000, which was the buyer's sightless bid. Just a few short weeks later, the new owner sold the very same coin, to another dealer, on a sight seen basis, for $15,000. So what is the value of this coin? Obviously, to the right dealer – $15,000. Needless to say, coins which have a high population can be traded with very tight spreads. But, when trading rare coins, value is in the eye of the beholder.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is $24 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a $7.50 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, $20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

ANACS

American Numismatic Association Certification Service: A nonprofit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is $20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs $22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, may make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

MINT STATE TYPE COINS

Prices are for the most common dates.
If the coin you have will stand on its own merits without the grading certificate and the CCDn bid is lower than the CDN then refer to the CDN.

NUMISMATIC
GUARANTY
CORPORATION
OF AMERICA

THE SIGN OF A NEW ERA IN COIN GRADING

The Numismatic Guaranty Corporation was founded to ensure unbiased, arms-length coin grading. The principals of NGC cannot buy, sell, or trade coins commercially. NGC is creating *the* standard for objective, consistent, and accurate grading of higher quality, investment grade coins.

Look for premium quality, NGC certified coins at the following Member/Dealers.
